Breaking the Silence Ellen Grünkemeier, 2013 South Africa is one of the countries in the world most affected by HIV/AIDS and yet until recently the epidemic was barely visible in South African literature. Much can be gained from approaching the South African epidemic through creative texts such as novels, photographs, films, cartoons, and murals because they produce and circulate meanings of HIV/AIDS and its various facets such as its origin, transmission routes, and physical manifestations. Other aspects explored are the denial of HIV/AIDS, its stigmatisation, discriminatory practices, modes of disclosure, access to anti-retroviral medication, as well as the role of alternative treatment. Creative texts which are open to different and possibly contradictory readings can serve as a starting point to increase the cultural visibility of the virus and to challenge dominant ideas about the epidemic. The cultural constructions of HIV/AIDS should be carefully examined because the meanings are pervasive and have very real consequences; they play a powerful role both in determining which issues receive attention and in shaping public understanding of the virus. **AB Bookman's Weekly**, 1998 **Subject Guide to Books in Print**, 1997 New York Magazine, 1990-01-22 New York Magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country.
