**Power, Discourse, Ethics** Kenneth D. Gariepy, 2015-12-21 In this unique study emerging higher education leader and policy expert Kenneth D Gariepy takes a Foucauldian genealogical approach to the study of the intellectually free subject through the analysis of selected academic freedom statement events Assuming academic freedom to be an institutionalized discourse practice operating in the field of contemporary postsecondary education in Canada a specific kind of cross disciplinary historico theoretical research is conducted that pays particular attention to the productive nature and effects of power knowledge The intent is to disrupt academic freedom as commonsensical good and universal right in order to instead focus on how it is that the academic subject emerges as free unfree to think and therefore free unfree to be through particular effective and effecting regimes of truth and strategies of objectification and subjectification In this way the author suggests how it is that academic freedom operates as a set of systemically agonistic practices that might only realize a different economy of discourse through the contingent nature of the very social power that produces it Dr Gariepy's use of Foucault's genealogical analysis provides a wholly different way in which to re think the construction and practice of academic freedom in Canada and is thus an important contribution to the broader discursive field it seeks to

analyze Given contemporary neoliberal critiques of the university the issue of academic freedom and the intellectually free subject is a vital problem that is of interest to numerous knowledge producing communities on and off campus Equally important in addressing the problem of academic freedom is how the book also contributes a new description of the genealogical method something Foucault did not stipulate that is original ambitious compelling and insightful I commend Dr Gariepy for returning to investigate anew an issue we think we know E Lisa Panayotidis PhD Professor Chair Educational Studies in Curriculum and Learning Werklund School of Education University of Calgary Editor of History of Intellectual Culture *It Happened in Vermont* Mark Bushnell,2009-04-14 From the French and Indian War to the exposure of Maple Corner thirty two events that shaped the Green Mountain State *American Science in an Age of Anxiety* Jessica Wang,2000-11-09 No professional group in the United States benefited more from World War II than the scientific community After the atomic bombings of Hiroshima and Nagasaki scientists enjoyed unprecedented public visibility and political influence as a new elite whose expertise now seemed critical to America s future But as the United States grew committed to Cold War conflict with the Soviet Union and the ideology of anticommunism came to dominate American politics scientists faced an increasingly vigorous regimen of security and loyalty clearances as well as the threat of intrusive investigations by the notorious House Committee on Un American Activities and other government bodies This book is the first major study of American scientists encounters with Cold War anticommunism in the decade after World War II By examining cases of individual scientists subjected to loyalty and security investigations the organizational response of the scientific community to political attacks and the relationships between Cold War ideology and postwar science policy Jessica Wang demonstrates the stifling effects of anticommunist ideology on the politics of science She exposes the deep divisions over the Cold War within the scientific community and provides a complex story of hard choices a community in crisis and roads not taken *Being Reflexive in Critical and Social Educational Research* Geoffrey Shacklock,John Smyth,2002-11-01 This text is a collection of case studies and readings on the subject of doing research in education It takes a personal view of the experience of doing research Each author presents a reflexive account of the issues and dilemmas as they have lived through them during the undertaking of educational research Coming from the researcher s own perspectives their positions are revealed within a wider space that can be personal political social and reflexive With this approach many issues such as ethics gender race validity reciprocity sexuality class voice empowerment authorship and readership are given an airing

**American Educational History Journal** J. Wesley Null,2009-11-01 The American Educational History Journal is a peer reviewed national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines The editors of AEHJ encourage communication between scholars from numerous disciplines nationalities institutions and backgrounds Authors come from a variety of disciplines including political science curriculum history philosophy teacher education and educational leadership Acceptance for publication in AEHJ requires that each author

present a well articulated argument that deals substantively with questions of educational history      **Standing Against Dragons** Sarah Hart Brown,2000-03 *Standing Against Dragons* examines the careers of three exceptional lawyers who championed civil liberties and fought for civil rights in the two decades after World War II John Coe of Pensacola Florida Clifford Durr of Montgomery Alabama and Benjamin Smith of New Orleans became southern dissenters resisting both the excessive zeal of the anti Communist right and southern segregation laws Coe Durr and Smith all appeared with their clients in the much publicized 1954 investigation of the Southern Conference Educational Fund and defended persons subpoenaed by the House Un American Activities Committee HUAC Coe represented the ardent integrationist who was the last man indicted for contempt by the HUAC and Smith's offices were raided in 1963 as a result of his civil rights work in Mississippi Despite personal and political differences these men remained committed civil libertarians in this era of repression While formally rejecting Communism defending freedom of expression and association in almost every instance these advocates in practice disavowed individualism in favor of the common good and feared the oppression of unbridled government Consequently they faced professional scorn personal ostracism and official harassment Sarah Hart Brown's astute analysis reveals the wide range of southern political ideas and defines the positions of southern liberals and radicals in the broader stream of American liberalism during the postwar period      **Priests of Our Democracy** Marjorie Heins,2013-12-22 *Priests of Our Democracy* tells of the teachers and professors who battled the anti communist witch hunt of the 1950s It traces the political fortunes of academic freedom beginning in the late 19th century both on campus and in the courts Combining political and legal history with wrenching personal stories the book details how the anti communist excesses of the 1950s inspired the Supreme Court to recognize the vital role of teachers and professors in American democracy The crushing of dissent in the 1950s impoverished political discourse in ways that are still being felt and First Amendment academic freedom a product of that period is in peril today In compelling terms this book shows why the issue should matter to everyone
