### **Cases, Materials and Text on Judicial Review of Administrative Action** Chris Backes, Mariolina

Elia Antonio, 2019-08-08 This casebook studies the law governing judicial review of administrative action. It examines the foundations and the organisation of judicial review, the types of administrative action and corresponding kinds of review and access to court. Significant attention is also devoted to the conduct of the court proceedings, the grounds for review and the standard of review and the remedies available in judicial review cases. The relevant rules and case law of Germany, England and Wales, France and the Netherlands are analysed and compared. The similarities and differences between the legal systems are highlighted. The impact of the jurisprudence of the European Court of Human Rights is considered as well as the influence of EU legislative initiatives and the case law of the Court of Justice of the European Union in the legal systems examined. Furthermore, the system of judicial review of administrative action before the European courts is studied and compared to that of the national legal systems. During the last decade, the growing influence of EU law on national procedural law has been increasingly recognised. However, the way in which national systems of judicial review address the requirements imposed by EU law differs substantially. The casebook compares the primary sources: legislation, case law, etc. of the legal systems covered and explores their differences and similarities. This examination reveals to what extent a *ius commune* of judicial review of administrative action is developing.

### **Privacy and Data Protection Issues of Biometric Applications**

Els J. Kindt, 2013-12-05 This book discusses all critical privacy and data protection aspects of biometric systems from a legal perspective. It contains a systematic and complete analysis of the many issues raised by these systems based on examples worldwide and provides several recommendations for a transnational regulatory framework. An appropriate legal framework is in most countries not yet in place. Biometric systems use facial images, fingerprints, iris and/or voice in an automated way to identify or to verify identity claims of persons. The treatise, which has an interdisciplinary approach, starts with explaining the functioning of biometric systems in general terms for non-specialists. It continues with a description of the legal nature of biometric data and makes a comparison with DNA and biological material and the regulation thereof. After describing the risks, the work further reviews the opinions of data protection authorities in relation to biometric systems and current and future EU law. A detailed legal comparative analysis is made of the situation in Belgium, France and the Netherlands. The author concludes with an evaluation of the proportionality principle and the application of data protection law to biometric data processing operations, mainly in the private sector. Pleading for more safeguards in legislation, the author makes several suggestions for a regulatory framework aiming at reducing the risks of biometric systems. They include limitations to the collection and storage of biometric data as well as technical measures which could influence the proportionality of the processing. The text is supported by several figures and tables providing a summary of particular points of the discussion. The book also uses the 2012 biometric vocabulary adopted by ISO and contains an extensive bibliography and literature sources.

Tomlinson,Anne Carter,2023-10-19 This book explores critical issues about how courts engage with questions of fact in public law adjudication Although the topic of judicial review the mechanism through which individuals can challenge governmental action continues to generate sustained interest amongst constitutional and administrative lawyers there has been little attention given to questions of fact This is so despite such determinations of fact often being hugely important to the outcomes and impacts of public law adjudication The book brings together scholars from across the common law world to identify and explore contested issues common challenges and gaps in understanding The various chapters consider where facts arise in constitutional and administrative law proceedings the role of the courts and the types of evidence that might assist courts in determining legal issues that are underpinned by complex and contested social or policy questions The book also considers whether the existing laws and practices surrounding evidence are sufficient and how other disciplines might assist the courts The book reconnects the key practical issues surrounding evidence and facts with the lively academic debate on judicial review in the common law world it therefore contributes to an emerging area of scholarly debate and also has practical implications for the conduct of litigation and government policy making **Landmark Cases in EU Law,**
