This comprehensive and instructive study examines the relative success or failure of government policies in preventing and alleviating unemployment Choosing two contrasting cases West Germany and the United States Thomas Janoski probes the causes and consequences of two very different orientations toward labor market policy In West Germany labor employers and government cooperate in the running of a powerful and effective employment service In the United States by contrast one finds little state involvement organizational confusion a long history of poor funding and legislative resistance to intervention in the labor market In the author's mind these inadequate policies have had deleterious consequences for the American labor force Whereas a skilled and flexible labor force exists in West Germany Americans are poorly trained and barely assisted in finding jobs and training To remedy this situation Janoski puts forth bold and useful policy recommendations including the creation of a new organization to operate in national labor markets the development of technical training programs in high schools and the creation of a youth service to prevent teenage crime The Political Economy of Unemployment offers a trenchant examination of how modern industrialized nations deal with the vicissitudes of the economy and how they might develop and implement more effective labor market policies Meticulously researched it is an important contribution that policymakers and social scientists will find provocative and useful This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990      *New Directions for Institutional Research* ,1984      **China's Economy Looks Toward the Year 2000** ,1986      **China's Economy Looks Toward the Year 2000: The four modernizations** ,1986      **Monthly Catalog of United States Government Publications** ,1993      **Ten Skills of Highly Effective Principals** June H.
