Recent Trends in Meaning-text Theory Leo Wanner, 1997-01-01 The present volume contains articles of well known representatives of the Meaning Text Theory MTT and other related linguistic theories Founded by I Mel'cuk and A Zholkovsky in the sixties in Moscow MTT soon became known in the West as a prominent outsider theory The picture changed since then though MTT gained importance in several areas of linguistics and computational linguistics It influenced the design of new grammar formalisms such as Dependency Tree Grammars Also specific parts of MTT have been directly overtaken into other theories consider for example the work on integrating Lexical Functions into Pustejovsky's Generative Lexicon The present volume is a further convincing demonstration of MTT's liveliness and relevance to the field's burning issues The focus of the volume is on semantics semantic representation and relation of semantics to surface in MTT Six out of eight articles Polguère Escalier Paducheva St Germain Beck Bogulavsky deal with problems related to these topics while the last two articles of the volume Sgall and Rambow Joshi throw a bridge between MTT or more precisely between dependency based theories of which MTT is one instantiation and other linguistic theories

Computing Attitude and Affect in Text: Theory and Applications James G. Shanahan, Yan Qu, Janyce Wiebe, 2006-01-17 Human Language Technology HLT and Natural Language Processing NLP systems have typically focused on the factual aspect of content analysis Other aspects including pragmatics opinion and style have received much less attention However to achieve an adequate understanding of a text these aspects cannot be ignored The chapters in this book address the aspect of subjective opinion which includes identifying different points of view identifying different emotive dimensions and classifying text by opinion Various conceptual models and computational methods are presented The models explored in this book include the following distinguishing attitudes from simple factual assertions distinguishing between the author's reports from reports of other people's opinions and distinguishing between explicitly and implicitly stated attitudes In addition many applications are described that promise to benefit from the ability to understand attitudes and affect including indexing and retrieval of documents by opinion automatic question answering about opinions analysis of sentiment in the media and in discussion groups about consumer products political issues etc brand and reputation management discovering and predicting consumer and voting trends analyzing client discourse in therapy and counseling determining relations between scientific texts by finding reasons for citations generating more

appropriate texts and making agents more believable and creating writers aids The studies reported here are carried out on different languages such as English French Japanese and Portuguese Difficult challenges remain however It can be argued that analyzing attitude and affect in text is an NLP complete problem *Selected Lexical and Grammatical Issues in the Meaning-text Theory* Leo Wanner,Igor? Aleksandrovi? Mel??uk,2007-01-01 The Meaning Text Theory MTT is a lexicon centred and dependency based theory for the description of language using a holistic model that incorporates semantics syntax morphology and lexis This volume prepared on the occasion of Igor Mel cuk s 70th birthday offers a cross section of the current advances in MTT and its applications The first part of the book focuses on lexical phenomena that are still largely neglected in mainstream linguistics sound symbolism as manifested by ideophones and idiosyncratic lexical relations as manifested by lexical functions LFs In particular LFs are addressed from different angles including the introduction of new standard LFs the argument structure and semantic decomposition of lexical relations captured by LFs automatic recognition of LF instances in corpora and the use of LFs in terminology and natural language processing The second part of the book deals with such prominent model oriented issues as semantic paraphrasing in MTT the role of phrase structure in MTT and syntactic analysis within MTT **Text Comprehension And Learning** Bernadette Van Hout-Wolters,Wolfgang Schnotz,2020-08-27 This book deals with the significance of different text structures and its cognitive processing in learning from texts It discusses the effect of learning abilities and attitudes for learning from texts and focuses on the significance of processing and learning strategies for text comprehension **The Text of the New Testament in Contemporary Research** Bart Ehrman,Michael W. Holmes,2001-08-22 Compiled in honor of Bruce M Metzger the most highly respected American textual critic in the history of the discipline this volume comprises twenty two full length essays on every major issue relating to New Testament textual criticism each written by an internationally recognized scholar in the field **The Pragmalinguistic Analysis of Narrative Texts** Richard J. significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture
