Sri Lanka at the Crossroads of History Zoltán Biedermann, Alan Strathern, 2017-06-07 The peoples of Sri Lanka have participated in far flung trading networks religious formations and Asian and European empires for millennia This interdisciplinary volume sets out to draw Sri Lanka into the field of Asian and Global History by showing how the latest wave of scholarship has explored the island as a crossroads a place defined by its openness to movement across the Indian Ocean Experts in the history archaeology literature and art of the island from c 500 BCE to c 1850 CE use Lankan material to explore a number of pressing scholarly debates They address these matters from their varied disciplinary perspectives and diverse array of sources critically assessing concepts such as ethnicity cosmopolitanism and localisation and elucidating the subtle ways in which the foreign may be resisted and embraced at the same time The individual chapters and the volume as a whole are a welcome addition to the history and historiography of Sri Lanka as well as studies of the Indian Ocean region kingship colonialism imperialism and early modernity *Governance issues for sustainable management of village irrigation in the Dry Zone of Sri Lanka* Imbulana, Upali, Aheeyar, Mohamed, Amarasinghe, Upali A., Amarnath, Giriraj, 2023-12-01 Village irrigation systems ViSs are vital in rural livelihood food and water security ViSs include small minor tanks and diversions anicuts The hydrologically linked tanks with natural drainage patterns form cascades and beyond food and water security they play a significant role in mitigating flood and drought impacts on communities in river basins With anthropogenic changes many cascades are in depilated states now This paper finds that policy support with legal recognition to cascade based community level institutions promote bottom up water and natural resources management approaches They also facilitate investigations of ill defined subject areas in cascade management and complex socio political and economic issues and challenges constraining sustainable cascade based ViSs operations **Marriage in Past, Present and Future Tense** Janet Carsten, Hsiao-Chiao Chiu, Siobhan Magee i, Eirini Papadaki , Koreen M. Reece, 2021-09-01 Marriage globally is undergoing profound change provoking widespread public comment and concern Through the close ethnographic examination of case studies drawn from Africa Asia Europe and North America Marriage in Past Present and Future Tense places new and changing forms of marriage in comparative perspective as a transforming and also transformative social institution In conditions of widespread socio political inequality and instability how are the personal the familial and the political co produced How do marriages encapsulate the ways in which memories of past lives present experience and imaginaries of the future are articulated Exploring the ways that marriage draws together and distinguishes history and biography ritual and law economy and politics in intimate family life this volume examines how familial and personal relations and the ethical judgements they enfold inform and configure social transformation Contexts that have been partly shaped through civil wars cold war and colonialism as well as other forms of violent socio political rupture offer especially

apt opportunities for tracing the interplay between marriage and politics But rather than taking intimate family life and gendered practice as simply responsive to wider socio political forces this work explores how marriage may also create social change Contributors consider the ways in which marital practice traverses the domains of politics economics and religion while marking a key site where the work of linking and distinguishing those domains is undertaken **Sri Lanka** Jonathan Spencer,2002-09-11 In the past decade Sri Lanka has been engulfed by political tragedy as successive governments have failed to settle the grievances of the Tamil minority in a way acceptable to the majority Sinhala population The new Premadasa presidency faces huge economic and political problems with large sections of the island under the control of the Indian Peace Keeping Force IPKF and militant separatist Tamil groups operating in the north and south This book is not a conventional political history of Sri Lanka Instead it attempts to shed fresh light on the historical roots of the ethnic crisis and uses a combination of historical and anthropological evidence to challenge the widely held belief that the conflict in Sri Lanka is simply the continuation of centuries of animosity between the Sinhalese and the Tamils The authors show how modern ethnic identities have been made and re made since the colonial period with the war between Tamils and the Sinhala dominant government accompanied by rhetorical wars over archeological sites and place name etymologies and the political use of the national past The book is also one of the first attempts to focus on local perceptions of the crisis and draws on a broad range of sources from village fieldwork to newspaper controversies Its interest extends beyond contemporary politics to history anthropology and development studies

Plant Breeding: Past, Present and Future John E. Bradshaw, 2016-03-08 This book aims to help plant breeders by reviewing past achievements currently successful practices and emerging methods and techniques Theoretical considerations are also presented to strike the right balance between being as simple as possible but as complex as necessary The United Nations predicts that the global human population will continue rising to 9 0 billion by 2050 World food production will need to increase between 70 100 per cent in just 40 years First generation bio fuels are also using crops and cropland to produce energy rather than food In addition land area used for agriculture may remain static or even decrease as

a result of degradation and climate change despite more land being theoretically available unless crops can be bred which tolerate associated abiotic stresses Lastly it is unlikely that steps can be taken to mitigate all of the climate change predicted to occur by 2050 and beyond and hence adaptation of farming systems and crop production will be required to reduce predicted negative effects on yields that will occur without crop adaptation Substantial progress will therefore be required in bridging the yield gap between what is currently achieved per unit of land and what should be possible in future with the best farming methods and best storage and transportation of food given the availability of suitably adapted cultivars including adaptation to climate change My book is divided into four parts Part I is an historical introduction Part II deals with the origin of genetic variation by mutation and recombination of DNA Part III explains how the mating system of a crop species determines the genetic structure of its landraces Part IV considers the three complementary options for future progress use of sexual reproduction in further conventional breeding base broadening and introgression mutation breeding and genetically modified crops

Electoral Politics in Sri Lanka S. Keethaponcalan, 2022-07-21 This volume examines and analyses electoral politics in Sri Lanka through the theoretical framework of manipulation The following questions guided the study how do political actors manipulate elections and what are the salient features of electoral politics in Sri Lanka Primary and secondary data formed the basis of the analysis examining eight presidential elections The research findings indicated that Sri Lankan governments political parties and political leaders have taken advantage of six types of electoral manipulation including constitutional tinkering field fixing time fixing vote suppression process manipulation and resource manipulation Through a close examination of eight presidential elections research carried out for the volume found that elections are often associated with violence presidential elections are mainly a majoritarian affair in which minority communities play only a marginal role there is a significant gender imbalance as women's participation in the electoral process is very limited despite the presence of a large number of candidates contesting the election it always remains a two way race and amid extensive manipulation and other problems voter participation tends to be high This volume will be a valuable resource for students academics and researchers who focus on democracy good governance electoral studies and South Asian politics and history and will enhance the conceptual foundation of democracy advocates and activists
