Stabilization And Structural Adjustment Macroeconomic Frameworks For Analyzing The Crisis In Sub Saharan Africa:

Stabilization and Structural Adjustment Finn Tarp, 2002-09-11 This book reveals and examines the relevance of the macroeconomic theory and models behind recommendations for stabilization and structural adjustment. Alternative analytical approaches are discussed. This is done on the basis of an up to date review of developments in sub-Saharan Africa during the 1980s and within a common analytical framework.

Accounting Education Research Richard M.S. Wilson, 2015-04-10 An annual prize is awarded for the best paper appearing in *Accounting Education*, an international journal, and this book contains the prize winning papers for every year from 1992 to 2012. The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice, and all the papers in this book relate to that mission. These papers, reporting on research studies undertaken by accounting education scholars from around the world, build on research findings from the broader domain of education scholarship and embrace a wide array of topics including curriculum development, pedagogic innovation, improving the quality of learning, and assessing learning outcomes. Of particular interest are three themes, each of which runs through several of the papers: students' approaches to learning and learning style preferences, ethics and moral intensity, and innovation within the accounting curriculum. Accounting educators will find many ideas in the book to help them in enriching their work, and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report, whether comparatively or longitudinally. This book is a compilation of papers originally published in *Accounting Education*, an international journal.

Quantifying Sustainable Development Charles A.S. Hall, Patrick Van Laake, Carlos Leon Perez, Gregoire Leclerc, 2000-07-12 Until recently the phenomenal economic development of the Asian tigers, Chile, and Malaysia, as well as the sustained economic growth of the United States, painted a very desirable and optimistic picture of free markets, fiscal responsibility, and more generally the entire dogma of neoclassical economics. As of the fall of 1998, however, the economies of many tropical countries have contracted severely, and the enthusiasm of the developing tropics for the free market and all of its ancillary policies is decidedly cooler. Have our traditional approaches to economics been failing the developing world? This interdisciplinary book covers the conditions of the developing tropics, the resistance of some of their problems to earlier attempts at solutions, and the use of new tools to develop a much more comprehensive and empirical framework for analysis and decision making. It also presents the development of cutting edge technology that links GIS and modeling approaches with extensive databases on meteorology, soils, agricultural production, and land use. The book discusses whether development is sustainable through a synthesis of demographic, economic, and resource specific considerations. Costa Rica is uniquely suited to this study because of its size, stage of development, democratic institutions, and national databases. A CD-ROM containing all data and programs, color images, animated models, large data tables, and references accompanies the book.
