Civil Society, Conflict Resolution, and Democracy in Nigeria Darren Kew, 2016-05-31 African nations have watched the recent civic dramas of the Arab Spring and Occupy Wall Street asking if they too will see similar civil society actions in their own countries Nigeria Africa's most populous nation has long enjoyed one of the continent's most vibrant civil society spheres which has been instrumental in political change Initially viewed as contributing to democracy's development however civil society groups have come under increased scrutiny by scholars and policymakers Do some civil society groups promote democracy more effectively than others And if so which ones and why By examining the structure organizational cultures and methods of more than one hundred Nigerian civil society groups Kew finds that the groups that best promote democratic development externally are themselves internally democratic Specifically the internally democratic civil society groups build more sustainable coalitions to resist authoritarian rule support and influence political parties more effectively articulate and promote public interests in a more negotiable fashion and most importantly inculcate democratic norms in their members which in turn has important democratizing impacts on national political cultures and institutions Further internally democratic groups are better able to resolve ethnic differences and ethnic based tensions than their

undemocratically structured peers This book is a deeply comprehensive account of Nigerian civil society groups in the late twentieth and early twenty first centuries Kew blends democratic theory with conflict resolution methodologies to argue that the manner in which groups and states manage internal conflicts provides an important gauge as to how democratic their political cultures are The conclusions will allow donors and policymakers to make strategic decisions in their efforts to build a democratic society in Nigeria and other regions Africa's Quiet Revolution Observed from Nigeri Dominic

Okereke,2012-07 This book prescribes rapid revolution in principal sectors of this African economy through radical paradigm changes And the resultant comprehensive transformation will guarantee significantly higher productivities and double digit annual economic growth Included in this paradigm shift is the joint reindustrialization of the African economy and the US ailing industries via a new Strategic trans Atlantic Alliance modeled on the balanced Euro US cooperation after World War II But it first takes readers through a thorough evaluation of the familiar subject corruption which haunts Nigeria the principal economy in the continent The fundamental difference with other texts on the subject is that this book identifies the most debilitating variant of that corruption That variant causes massive capital flight from a post colonial soft economy that is neither capitalist nor socialist The Nigerian corruption thrives on the native Philosophy of Commission hardened by intractable tribalism that coagulated and ossified with the imports substitution pattern preferred by European firms since independence The book then proceeds to earn its priced revolutionary credential by inventing very novel scientific methods that will skillfully turn this insidious source of structural rigidity and arrested development into a force for economic growth A new apex political leadership culture is recommended and to be fortified with a unifying lingua franca An inter ethnic marriage melting pot is advised for intensified nigerianization of Nigerian youths at birth Spiritual diversity is envisaged to significantly diminish religious intolerance and sectarian violence Modern bureaucracy and inward looking tourism are reformulated to reduce effervescent insecurity and minimize capital flight The resultant economic stability will enlarge domestic foreign investment inflow and will reverse the current dis industrialization and massive job loss and the conditions of under full employment Technological Functionalism Economic pan Africanism and the Alternative Policy of Inputs Substitution are among the several brand new blueprints that this book offers for the extensive transformation of Africa s economy into the robust emerging economy that will rival its counterparts in India and China in the immediate future

The Coming African Hour Luc Sindjoun,2010-08-15 The Coming African hour is not a slogan nor wishful thinking It is a conclusion that derives from an insightful analysis of the current situation pertaining on the continent Several African scholars coming from different regions and academic backgrounds are elaborating ideas and arguments in order to explain the constraints and to illustrate the opportunities The result of that scientific gathering is a book that synthesizes and renews the reflections on development What is at stake is not to be pessimistic or optimistic about Africa The epistemological challenge is to understand what is going on By focusing on converging and diverging African realities on the issues of state

civil society gender and development strategies the authors of the book show under which conditions the African hour is coming At that level the commitment for political science meets the commitment for Africa The main success of this book is to overcome the preconceived ideas and self fulfilling prophecies about Africa Here the analysis avoids the trap of indulgence then hope is based on truth Consequently the coming African hour is not inescapable it is as analyzed a possibility that its achievement depends on institutional human political social and economic factors

Religion, Conflict, and Democracy in Modern Africa Samuel K. Elolia, 2012-03-02 Spanning various regions of Sub Saharan Africa the authors of this volume come together to explore the complex relationship between religion and democracy in contemporary Africa As a result of the end of the Cold War and the fall of the Soviet Union many African countries have come to the realization however partial that political and social change is inevitable in spite of government heavy handedness and threats It has also become evident that no political system that refuses to permit freedom of political expression and alternative systems of governance could continue to be sustained It is in precisely this political climate that religious institutions have collaborated with other elements of civil society to call for political reforms with the church often becoming the prominent voice against oppressive governments in countries such as Kenya and South Africa It is the purpose of this book to assess how religion shapes political issues and to what extent religious forces influence the civil society By acknowledging the role of the civil society the essays recognize the resilience that comes out of Africa even when the sociopolitical situation seems unbearable

The Politics and Policies of Sub-Saharan Africa Robert A. Dيبie, 2001 This book attempts to correct the impression created by Western media that Sub Saharan Africa is in a state of anarchy The text analyzes and shows that while many Sub Saharan African nations are experiencing the worst time of their history others are enjoying their best times Thus the text argues that although some parts of Africa are experiencing crisis the continent is also a fine region of major new experiments in governance peace building and free market transformation programs Finally the text focuses some of its analyses on the colonial legacy economic and ethnic transformation indigenous institutions and other forces that seem to influence the governance of Sub Saharan African nations
