## **Stable Paretian Models In Finance:**

Stable Paretian Models in Finance Svetlozar T. Rachev, Stefan Mittnik, 2000-06-15 This text is a comprehensive treatment of the Asset Pricing Theory based on the assumption that returns are distributed non normally More general models are also considered and the corresponding formulae are derived and it describes estimation techniques and presents empirical applications

**Handbook of Heavy Tailed Distributions in Finance** S.T Rachev, 2003-03-05 The Handbooks in Finance are intended to be a definitive source for comprehensive and accessible information in the field of finance Each individual volume in the series should present an accurate self contained survey of a sub field of finance suitable for use by finance and economics professors and lecturers professional researchers graduate students and as a teaching supplement The goal is to have a broad group of outstanding volumes in various areas of finance The Handbook of Heavy Tailed Distributions in Finance is the first handbook to be published in this series This volume presents current research focusing on heavy tailed distributions in finance The contributions cover methodological issues i e probabilistic statistical and econometric modelling under non Gaussian assumptions as well as the applications of the stable and other non Gaussian models in finance and risk management

**Handbook of Computational and Numerical Methods in Finance** Svetlozar T. Rachev, 2011-06-28 Numerical Methods in Finance have recently emerged as a new discipline at the intersection of probability theory finance and numerical analysis They bridge the gap between financial theory and computational practice and provide solutions to problems where analytical methods are often non applicable Numerical methods are more and more used in several topics of financial analysis computation of complex derivatives market credit and operational risk assessment asset liability management optimal portfolio theory financial econometrics and others Although numerical methods in finance have been studied intensively in recent years many theoretical and practical financial aspects have yet to be explored This volume presents current research focusing on various numerical methods in finance The contributions cover methodological issues Genetic Algorithms Neural Net works Monte Carlo methods Finite Difference Methods Stochastic Portfolio Optimization as well as the application of other numerical methods in finance and risk management As editor I am grateful to the contributors for their fruitful collaboration I would particularly like to thank Stefan Trueck and Carlo Marinelli for the excellent editorial assistance received over the progress of this project Thomas Plum did a splendid word processing job in preparing the manuscript owe much to George Anastassiou Consultant Editor Birkhauser and Ann Kostant Executive Editor Mathematics and Physics Birkhauser for their help and encouragement

Financial Models with Levy Processes and Volatility Clustering Svetlozar T. Rachev, Young Shin Kim, Michele L. Bianchi, Frank J. Fabozzi, 2011-02-08 An in depth guide to understanding probability distributions and financial modeling for the purposes of investment management In Financial Models with Levy Processes and Volatility Clustering the expert author team provides a framework to model the behavior of stock returns in both a univariate and a multivariate setting providing you with practical applications to option pricing and

portfolio management They also explain the reasons for working with non normal distribution in financial modeling and the best methodologies for employing it The book s framework includes the basics of probability distributions and explains the alpha stable distribution and the tempered stable distribution The authors also explore discrete time option pricing models beginning with the classical normal model with volatility clustering to more recent models that consider both volatility clustering and heavy tails Reviews the basics of probability distributions Analyzes a continuous time option pricing model the so called exponential Levy model Defines a discrete time model with volatility clustering and how to price options using Monte Carlo methods Studies two multivariate settings that are suitable to explain joint extreme events Financial Models with Levy Processes and Volatility Clustering is a thorough guide to classical probability distribution methods and brand new methodologies for financial modeling

*Financial Econometrics* Svetlozar T. Rachev, Stefan Mittnik, Frank J. Fabozzi, Sergio M. Focardi, Teo Jašić, 2007-03-22 A comprehensive guide to financial econometrics Financial econometrics is a quest for models that describe financial time series such as prices returns interest rates and exchange rates In Financial Econometrics readers will be introduced to this growing discipline and the concepts and theories associated with it including background material on probability theory and statistics The experienced author team uses real world data where possible and brings in the results of published research provided by investment banking firms and journals Financial Econometrics clearly explains the techniques presented and provides illustrative examples for the topics discussed Svetlozar T Rachev PhD Karlsruhe Germany is currently Chair Professor at the University of Karlsruhe Stefan Mittnik PhD Munich Germany is Professor of Financial Econometrics at the University of Munich Frank J Fabozzi PhD CFA CFP New Hope PA is an adjunct professor of Finance at Yale University s School of Management Sergio M Focardi Paris France is a founding partner of the Paris based consulting firm The Intertek Group Teo Jasic PhD Frankfurt Germany is a senior manager with a leading international management consultancy firm in Frankfurt
