Staging Growth Modernization Development And The Global Cold War:

Staging Growth David C. Engerman, 2003 Situating modernization theory historically *Staging Growth* avoids conventional chronologies and categories of analysis particularly the traditional focus on conflicts between major powers The contributors employ a variety of approaches from economic and intellectual history to cultural criticism and biography to shed fresh light on the global forces that shaped the Cold War and its legacies Most of the pieces are comparative exploring how different countries and cultures have grappled with the implications of modern development At the same time all of the essays address similar fundamental questions Is modernization the same thing as Westernization Is the idea of modernization universally valid Do countries follow similar trajectories as they undertake development Does modernization bring about globalization Publisher **The Right Kind of Revolution** Michael E. Latham, 2011-01-15 After World War II a powerful conviction took hold among American intellectuals and policymakers that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world serving as a modernizing force around the globe By accelerating economic growth promoting agricultural expansion and encouraging the rise of enlightened elites they hoped to link development with security preventing revolutions and rapidly creating liberal capitalist states In *The Right Kind of Revolution* Michael E Latham explores the role of modernization and development in U S foreign policy from the early Cold War through the present The modernization project rarely went as its architects anticipated Nationalist leaders in postcolonial states such as India Ghana and Egypt pursued their own independent visions of development Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality damaging the environment and supporting coercive social policies In countries such as Guatemala South Vietnam and Iran U S officials and policymakers turned to modernization as a means of counterinsurgency and control ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s Since the end of the Cold War the faith in modernization as a panacea has reemerged The idea of a global New Deal however has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways U S policymakers have continued to insist that history has a clear universal direction but events in Iraq and Afghanistan give the lie to modernization's false hopes and appealing promises *The Cambridge History of the Cold War* Melvyn P. Leffler, Odd Arne Westad, 2010-03-25 This volume examines the origins and early years of the Cold War in the first comprehensive historical reexamination of the period A team of leading scholars shows how the conflict evolved from the geopolitical ideological economic and sociopolitical environments of the two world wars and interwar period *Uncertain Empire* Joel Isaac, Duncan Bell, 2012-09-06 Historians have long understood that the notion of the cold war is richly metaphorical if not paradoxical The conflict between the United States and the Soviet Union was a war that fell ambiguously short of war an armed truce that produced considerable bloodshed Yet scholars in the

rapidly expanding field of Cold War studies have seldom paused to consider the conceptual and chronological foundations of the idea of the Cold War itself In *Uncertain Empire* a group of leading scholars takes up the challenge of making sense of the idea of the Cold War and its application to the writing of American history They interrogate the concept from a wide range of disciplinary vantage points diplomatic history the history of science literary criticism cultural history and the history of religion highlighting the diversity of methods and approaches in contemporary Cold War studies Animating the volume as a whole is a question about the extent to which the Cold War was an American invention *Uncertain Empire* brings debates over national global and transnational history into focus and offers students of the Cold War a new framework for considering recent developments in the field *Thomas C. Mann* Thomas Tunstall Allcock, 2018-12-07 Lyndon Johnson was often blamed for abandoning Kennedy's vision of development and progress in Latin America in favor of his own domestic concerns anti communism and economic stability Johnson along with his fellow Texan and chief adviser on inter American affairs Thomas C Mann nonetheless offered a vision for American engagement with the developing world even as congressional funding and public enthusiasm for such programs waned and Johnson's presidency collapsed under the weight of the Vietnam War This book explores Lyndon Johnson's Latin American policy from his key advisers to development programs and military interventions to establish a new perspective on the impact of a complex and controversial president on a tumultuous period in the history of the Western Hemisphere Demonstrating that much of the negative coverage of their efforts emerged from disgruntled Kennedy loyalists Tunstall Allcock argues that Johnson and Mann were both New Dealers who possessed a keen desire to operate as good neighbors and support Latin American development and regional integration while dealing with domestic pressure from both right and left Based on extensive primary research in multiple archives this much needed book provides a crucial exploration of how inter American relations transitioned from the enthusiasm and excitement of the Kennedy years to the neglect and frustration of the Nixon presidency *Knowledge Production in Cold War Asia* Yuka Tsuchiya Moriguchi, Shin Kawashima, Somei Kobayashi, 2025-04 From the end of the Second World War to the early 1970s new paradigms began to form in academic scientific and professional knowledge in various disciplines and fields not only in the United States but also in East Asia Drawing on a wealth of archival documents from East Asia *Knowledge Production in Cold War Asia* focuses on the building and rebuilding of these different forms of knowledge in or about East Asia during the first half of the Cold War It explores how this newly constructed knowledge came to assume certain norms professionals and bureaucrats of these countries tried to comply with and sometimes wrestled with The essays within this collection explore a wide variety of this knowledge production state centered promotions of construction and normalization of knowledge the ways in which non state actors were involved in the construction and normalization of knowledge and how individuals and groups who resisted or protested the hegemonic knowledge were constructed by state or non state actors A distinctive look at the Cold War through the research and perspectives of scholars from East Asia *Knowledge Production in Cold War Asia*

insightfully highlights the role of knowledge production normalization and resistance in the Cold War era contributing to a fuller understanding of international relations **The Middle East and the Cold War** Matteo Gerlini, Massimiliano

Trentin, 2012-01-24 There have been quite a lot of attempts to find out exactly what the impact of the Cold War on the Middle East was and this from different disciplinary perspectives This volume tries to integrate the historical debate with new fresh insights thanks to the works of young scholars who are currently engaged in archival and field research Algeria Sudan Jordan as well as Syria Israel and Iran during the embattled 1950s and 1960s are the objects of this volume which draws a much more complicated picture than one might expect As a matter of fact both the Cold War superpowers and their European allies proved constrained in their interventions to shape the political and economic dynamics of the region according to their own plans on the contrary Middle Eastern rulers enjoyed remarkable autonomy to achieve their goals and fully exploited in rhetorics and practice the competition and rivalry which divided the industrial countries during the Cold War The process of decolonization and the related construction of new patterns of national sovereignty and development were major issues at stake for both the Cold War camps and their postcolonial partners in the Middle East Though peculiar the region proved to be no exception to global trends The so called liberal Fifties as well as the radical Sixties of the XXth century were times of great conflict and change setting much of the institutions and patterns of development which lasted for three decades at least but also providing fresh opportunities for new social and politics groups to emerge and consolidate in power In light of the current events in North Africa and the Middle East at large this volume is a highly valuable contribution to the deeper and wider understanding of the region in itself as well as the patterns of its integration within the wider global world **The**

NGO CARE and food aid from America, 1945-80 Heike Wieters, 2017-07-21 This book provides a historical account of the NGO CARE as one of the largest humanitarian NGOs worldwide from 1945 to 1980 Readers interested in international relations and humanitarian hunger prevention are provided with fascinating insights into the economic and business related aspects of Western non governmental politics fundraising and philanthropic giving in this field Not only does the book contributes to ongoing research about the rise of NGOs in the international realm it also offers very rich empirical material on the political implications of private and governmental international aid in a world marked by the order of the Cold War decolonialization processes and the struggle of so called Third World Countries to catch up with modern Western consumer societies **The Oxford Handbook of the Cold War** Richard H. Immerman, Petra Goedde, 2013-01-31 The Oxford

Handbook of the Cold War offers a broad reassessment of the period war based on new conceptual frameworks developed in the field of international history Nearing the 25th anniversary of its end the cold war now emerges as a distinct period in twentieth century history yet one which should be evaluated within the broader context of global political economic social and cultural developments The editors have brought together leading scholars in cold war history to offer a new assessment of the state of the field and identify fundamental questions for future research The individual chapters in this volume

evaluate both the extent and the limits of the cold war's reach in world history. They call into question orthodox ways of ordering the chronology of the cold war and also present new insights into the global dimension of the conflict. Even though each essay offers a unique perspective together they show the interconnectedness between cold war and national and transnational developments including long standing conflicts that preceded the cold war and persisted after its end or global transformations in areas such as human rights or economic and cultural globalization. Because of its broad mandate the volume is structured not along conventional chronological lines but thematically offering essays on conceptual frameworks regional perspectives cold war instruments and cold war challenges. The result is a rich and diverse accounting of the ways in which the cold war should be positioned within the broader context of world history.

America in the World Frank Costigliola, Michael J. Mandarins of the Future Nils Gilman, 2004-12-01 Because it provided the dominant framework for development of poor postcolonial countries modernization theory ranks among the most important constructs of twentieth century social science. In *Mandarins of the Future: Modernization Theory in Cold War America* Nils Gilman offers the first intellectual history of a movement that has had

far reaching and often unintended consequences After a survey of the theory's origins and its role in forming America's postwar sense of global mission Gilman offers a close analysis of the people who did the most to promote it in the United States and the academic institutions they came to dominate He first explains how Talcott Parsons at Harvard constructed a social theory that challenged the prevailing economics centered understanding of the modernization process then describes the work of Edward Shils and Gabriel Almond in helping Parsonsian ideas triumph over other alternative conceptions of the development process and finally discusses the role of Walt Rostow and his colleagues at M I T in promoting modernization theory during the Kennedy and Johnson administrations By connecting modernization theory to the welfare state liberalism programs of the New Deal order Gilman not only provides a new intellectual context for America's Third World during the Cold War but also connects the optimism of the Great Society to the notion that American power and good intentions could stop the postcolonial world from embracing communism

Indonesia The study gives a strongly backed argument that Sukarno s constitutional reform during the Guided Democracy period inadvertently provided a strong managerial blueprint for the New Order developmentalist state

Thinking Small Daniel Immerwahr, 2015 Winner of the Merle Curti Award in Intellectual History Organization of American Historians Co Winner of the Society for U S Intellectual History Book Award Thinking Small tells the story of how the United States sought to rescue the world from poverty through small scale community based approaches And it also sounds a warning such strategies now again in vogue have been tried before with often disastrous consequences Unfortunately far from eliminating deprivation and attacking the social status quo bottom up community development projects often reinforced them This is a history with real stakes If that prior campaign s record is as checkered as Thinking Small argues then its intellectual descendants must do some serious rethinking How might those in twenty first century development and anti poverty work forge a better path They can start by reading Thinking Small

Merlin Chowkwanyun Boston Review As the historian Daniel Immerwahr demonstrates brilliantly in Thinking Small the history of development has seen constant experimentation with community based and participatory approaches to economic and social improvement Immerwahr s account of these failures should give pause to those who insist that going small is always better than going big Jamie Martin The Nation
