*Staircases* Karl J. Habermann, 2003 Despite the ever widening range of ready made components on the market an expertly made staircase aptly fitting the building is still a hallmark of good architecture and reveals much about an architect's approach to design construction and materials This volume reviews the current state of technology in stair construction providing a comprehensive overview of the latest production methods useful for the day to day work Following an introductory essay on the development of staircases the fundamental principles in building stairs are documented and essential information is provided on the crucial elements of construction and the creative possibilities of the basic materials wood steel and concrete The theory is illustrated by a large number of extensively documented international examples providing an invaluable source of inspiration for builders and architects As a practical aid the book contains a subject index glossary and information on current regulations and norms

Techniques of Staircase Construction W. Mannes, 2012-12-06 Staircases which today are equally the responsibility of joiners The increasing demand for textbooks on the techniques of stair and carpenters have had a varied history over the last thirty years Until 1945 construction is due to two main factors years Until 1945 nearly all staircases even those in large residential blocks were made of wood Because of the amount of 1 The relatively small dwellings that were built twenty to thirty years ago are no longer regarded as acceptable New regulations frequently stipulated nonflammable materials for almost all dwellings concerning noise and heat insulation as well as government aid available to finance such projects have in addition This resulted in a decline in the quality of stair construction and thus the design of more what is more fewer and fewer craftsmen were trained for this generously proportioned dwellings including of course rewarding and varied branch of woodworking craftsmanship staircases This is a regrettable development since good stair builders must combine the design capabilities and three dimensional approach 2 The style of living has changed The time when sober interiors of the carpenter with the exact and neat craftsmanship of the joiners were the order of the day has gone Excessive nostalgic

*Techniques of Staircase Construction* therefore provides welcome reversal to previous styles has also passed
