Clay's groundbreaking and transformative literacy processing theory. Clay's theories have created literacy success for more than 2 million struggling first grade readers in the United States and internationally through the Reading Recovery program. This practical volume gives primary grade teachers specific suggestions for using these principles and includes rich robust instructional examples to ensure that all children meet new and rigorous standards in all facets of literacy learning. Replete with explicit depictions of classroom practice, the book addresses the following critical aspects of K-2 literacy instruction: Teaching foundational skills in brief skills lessons and as children learn strategic activity to read and write text; Teaching for children's fast progress in increasingly complex literacy tasks; Understanding the role of complex frustration; Instructional familiar and easy texts in reading instruction; Teaching for knowledge building comprehension and writing for narrative and informational text. Reader friendly chapters include Focus questions to target readers' anticipation of topics discussed; Illustrative examples of powerful teacher-student interaction; Connections between Clay's comprehensive theory of children's literacy development, literacy standards, and children's fast progress to literacy proficiency. The combination of Marie Clay's research and theory with the authors' understanding of these principles in today's classroom is what sets this book apart. Lisa Lenhart, director, Center for Literacy Curricular Instructional Studies, The University of Akron; Gibson and Moss provide a resource for classroom teachers to support the continued learning of all their students, especially those who need an aware and skilled teacher to keep them on track across the primary grades. Robert M. Schwartz, professor, Oakland University and trainer of teacher leaders, Reading Recovery Center for Michigan. This comprehensive and well-designed book will be an excellent professional development resource for classroom teachers, Reading Recovery teachers, literacy coaches, specialists, and site administrators. Whose Knowledge Counts in Government Literacy Policies? Kenneth S. Goodman, Robert C. Calfee, Yetta M. Goodman, 2013-10-01. Accountability in the form of standardized test scores is built into many government literacy policies with severe consequences for schools and districts that fail to meet ever increasing performance levels. The key question this book addresses is whose knowledge is considered in framing government literacy policies. The intent is to raise awareness of the degree to which expertise is being ignored on a worldwide level and pseudo science is becoming the basis for literacy policies and laws. The authors, all leading researchers from the U.S., U.K., Scotland, France, and Germany, have a wide range of views but share in common a deep concern about the lack of respect for knowledge among policy makers. Each author comes to the common subject of this volume from the vantage point of his or her major interests, ranging from an exposition of what should be the best knowledge utilized in an aspect of literacy education policy to how political decisions
