Text In Context:

Text, Context, Concepts Cornelia Zelinsky-Wibbelt, 2011-05-02 The common aim of the contributions to this volume is to shed light on the communication of conceptual structures The papers investigate how speakers rely on the same cognitive dispositions in three different areas of transfer in the lexicalization of metonymies and metaphors in intercultural communication and in expert lay communication

Text, Context and Construction of Identity Rajesh Kumar, Om Prakash, 2019-04-30 Language is central to our existence and it happens to be the most sophisticated product of the human mind It is inconceivable to think of ourselves our societies our ideas cultures or identities without language It is the primary means of socialization and whatever we know is a result of it It is the primary medium of construction and dissemination of knowledge and structures our thought processes in important ways that constitute our identity In very complex ways it interacts with the social political and economic power structures that remain significant in defining the identities of individuals and societies The essays in this volume create an awareness and understanding about the role of linguistic context in negotiating identity The book explains identity and the complex relations between language and several aspects of our society It explores identity through text and context and will serve to trigger a novel discourse around the centrality of identity in contemporary society

Theory, Text, Context Christopher Lyle Johnstone, 1996-10-03 Leading scholars of classical rhetoric address contemporary topics in Greek rhetoric and oratory

Making Sense of Text Linda Gerot, 1998

Text, Context and the Johannine Community David A. Lamb, 2014-04-24 Text Context and the Johannine Community adopts a new approach to the social context of the Johannine writings by drawing on modern sociolinguistic theory Sociolinguistics emphasizes language as a social phenomenon which can be analysed with reference not only to its broad context of culture but also through the use of register analysis to its narrower context of situation The Johannine writings have increasingly been seen as the product of a distinct Johannine Community depicted by some scholars as a sectarian group opposed both to wider Jewish society and to other Christian groups This model has largely been constructed on historical critical grounds yet given our lack of reliable external information about the origin of the Johannine writings a more fruitful approach may be to examine their lexico grammatical and discourse features to determine what these imply about interpersonal relationships This study compares selected narrative asides from the Gospel of John with a passage section from 1 John and with the two shorter Johannine Epistles It concludes that register analysis of these texts does not support the idea of a close knit sectarian group

Text and Context in New Testament Hermeneutics J. N. Kanyua Mugambi, Johannes A. Smit, 2004

Artifact, Text, Context Li Tang, Dietmar W. Winkler, 2020 This volume is a collection of papers highlighting recent researches on Syriac Christianity in China and Central Asia The topics range from artifacts to texts and their historical contexts covering the period from the 7th to the 18th century As the studies on Syriac Christianity in China and Central advance focus has shifted from a general historical survey and textual translation to a more micro and

meticulous study of specific concepts and terms and particular names of persons and places

Information Context:
Nature, Impact, and Role Fabio Crestani, Ian Ruthven, 2005-05-20 CoLIS 5 was the fifth in the series of international conferences whose general aim is to provide a broad forum for critically exploring and analyzing research in areas such as computer science, information science, and library science. CoLIS examines the historical, theoretical, empirical, and technical issues relating to our understanding and use of information, promoting an interdisciplinary approach to research. CoLIS seeks to provide a broad platform for the examination of context as it relates to our theoretical, empirical, and technical development of information-centered disciplines. The theme for CoLIS 5 was the nature, impact, and role of context within information-centered research. Context is a complex, dynamic, and multi-dimensional concept that influences both humans and machines: how they behave individually and how they interact with each other. In CoLIS 5, we took an interdisciplinary approach to the issue of context to help us understand the theoretical approaches to modelling and understanding context, incorporate contextual reasoning within technology, and develop a shared framework for promoting the exploration of context.
