are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand So too in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field including in the Handbook both previous tutor education textbooks and research from the field The aim is to aid the interested reader's inquiry into the scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness a range of tutoring practices Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day to day work and in their informed thinking about this work Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country
