Stabilizing World Commodity Markets Francis Gerard Adams, Sonia A. Klein, 1978 **Stabilizing World Commodity Markets** Francis Gerard Adams, 1978 Commodity Models for Forecasting and Policy Analysis Walter C. Labys, Peter K. Pollak, 2024-02-01 Originally published in 1984 this book remains as relevant as when it was first published At that time the oil crises of the 1970s and the growing international debt burden highlighted the extent to which events in primary commodity markets continue to influence the economies of developing and industrialized economies alike Commodity modelling has become a valuable tool in efforts to predict and understand the behaviour of commodity markets and thereby reduce their fluctuations This book provides an overview of the nature of the different types of commodity model as well as their diverse applications In non technical language the reader is introduced to the underlying modelling methodologies including their advantages limitations and commodity specific implications The book will be of interest to commodity economists traders and analysts economic planners and those involved in agricultural mineral and energy modelling **Stabilizing Speculative Commodity Markets** S. Ghosh, C. L. Gilbert, Andrew Hughes Hallett, 1987 After briefly reviewing the problems caused by commodity price instability the authors develop a mathematical model for commodity markets The implications of this model for intervention and the welfare effects are then considered A fully developed model of the world copper market is used to investigate alternative buffer stock intervention rules in order to assess the scope and limitations of such stabilization strategies *Stabilization of International Commodity Markets* Paul Hallwood, 1979 **International Commodity Stabilization Arrangements** United States. Congress. House. Committee on Banking, Currency and Housing. Subcommittee on International Trade, Investment and Monetary Policy, 1975 **International Commodity Stabilization Arrangements** United States Congress. House. Banking and Currency Committee, 1975 *International Commodity Policy* Roland Herrmann, Kees Burger, Hidde P. Smit, 2023-04-01 Originally published in 1993 this book provides an excellent analysis of commodity policies internationally during the late 20th Century It discusses 2 major methods of market regulation price stabilization based on buffer stocks or export quotas and compensatory finance The authors analyse whether major commodity policies have reached their primary objectives and to what extent they have had economic side effects Discussion of more general policy issues centres around three international commodity agreements for coffee rubber and cocoa The authors also look at the policies adopted by individual nations to regulate commodity trading and assess to what extent they have reached their objectives A discussion of the intervention of the International Monetary Fund and STABEX assesses the degree of stability they can provide in a highly volatile and variable environment Nearly 30 years later volatile world commodity markets are still a major issue in the policy dialogue Although topics policy instruments and concepts have changed this book remains a fundamental contribution to the study of international commodity policy It will be of great interest to students of commodity policy and economic development and

economists in national and international organizations dealing with market stabilization

Price Stabilization on World Agricultural Markets Bernd Lucke, 2012-12-06 International commodity markets have traditionally attracted the attention of economists econometricians and policy makers especially in and following politically tumultuous times For instance the primary commodity price boom of 1973 74 and the subsequent period of highly volatile world market prices initiated increased research on commodity markets which quickly focused on possible price stabilization schemes particularly on buffer stocks Simultaneously the issue clearly advanced in priority on the political agenda such that the United Nations Conference on Trade and Development UNCTAD proposed an Integrated Program for Commodities IPC intended to stabilize the world market prices of ten so called core commodities UNCTAD 1974 1976a Behrman 1979 Many developing nations welcomed the IPC almost enthusiastically but it did not receive more than lukewarm support by major industrialized countries apparently due to the experience with some thirty international commodity agreements past World War II² Critical evaluations have among others been presented by McNicol 1978 Gordon Ashworth 1984 and Macbean Nguyen 1987 The most detailed of these studies is Gordon Ashworth's who concludes that on balance the performance of international commodity agreements has been too unreliable and their distributive effects too uneven to secure the development goals that have been set 1984 p 284 3 Consequently the IPC turned out to be quite controversial a topic on the UNCTAD's 1976 meeting in Nairobi and has not been able to gain any impetus since lThese were cocoa coffee copper cotton jute rubber sisal sugar tea and tin

Committee on Banking, Finance, and Urban Affairs. Subcommittee on Economic Stabilization,1978 *Stabilizing Currency and Preserving Economic Sovereignty Using the Grondona System* Collins, Patrick,2022-01-07 The monetary instability experienced in recent years imposes enormous costs worldwide and has led to calls for a reset of the international monetary system To avoid the problem arising again the value of money must once again be defined in terms of some real commodity or commodities as it has been for most of history However making currencies convertible into gold once again would be no panacea A better alternative first proposed in the 19th century and advocated in the 20th century is for money to be made convertible into a range of commodities other than gold *Stabilizing Currency and Preserving Economic Sovereignty Using the Grondona System* discusses how a sustainable basis for sovereign national money systems can be simply achieved by implementing the Grondona System whereby the value of currency is stabilized by making it conditionally convertible into a range of primary commodities Covering a range of topics such as economic growth fiat money and digital currencies this book is ideal for policymakers economists investors academicians researchers instructors and students Commodity Policies Alasdair I. MacBean,D. T. Nguyen,2024-02-01 Originally published in 1987 this book discusses the key issues concerned with primary commodity trade worldwide Primary commodities are crucially important for many developing countries because very often exports in just one or two primary commodities form the sole source of income for a developing country Developing countries need above all stability in primary commodities trade to guarantee their future development This book examines patterns of trade changing demand and the effects of fluctuations in spot and futures markets It analyses theories put forward to explain the problems and it reviews the research of the many international organisations which are concerned with the problems It examines the international agreements and bodies which have been set up to stabilise trade and assesses the performance of these agreements and organisations Global International Economic Models B.G. Hickman,2014-06-28 This volume surveys the state of the art of global international modeling All 15 models included in the survey feature national or regional disaggregation of the world economy and interdependencies among the various nations and regions A few are constructed for short term forecasting but the primary focus is on long run models and applications Macroeconomic input output general equilibrium trade and exchange rate and several hybrid models are included A cross sectional analysis by the editor compares the structures linkage mechanisms

methodologies and applications of the various models and concludes with some observations on prospective research trends
