Stag Hunt:

Rock, Paper, Scissors Len Fisher, 2008-11-04 Praised by Entertainment Weekly as the man who put the fizz into physics Dr Len Fisher turns his attention to the science of cooperation in his lively and thought provoking book Fisher shows how the modern science of game theory has helped biologists to understand the evolution of cooperation in nature and investigates how we might apply those lessons to our own society In a series of experiments that take him from the polite confines of an English dinner party to crowded supermarkets congested Indian roads and the wilds of outback Australia not to mention baseball strategies and the intricacies of quantum mechanics Fisher sheds light on the problem of global cooperation The outcomes are sometimes hilarious sometimes alarming but always revealing A witty romp through a serious science Rock Paper Scissors will both teach and delight anyone interested in what it takes to get people to work together

Mosaics of the Greek and Roman World Katherine M. D. Dunbabin, 1999 This book provides a comprehensive account of mosaics in the ancient world from the early pebble mosaics of Greece to the pavements of Christian churches in the East Separate chapters in Part I cover the principal regions of the Roman Empire in turn in order to bring out the distinctive characteristics of their mosaic workshops Questions of technique and production of the role of mosaics in architecture and of their social functions and implications are treated in Part II The book discusses both well known works and recent finds and balances consideration of exceptional masterpieces against standard workshop production Two main lines of approach are followed throughout first the role of mosaics as a significant art form which over an unbroken span illuminates the evolution of pictorial style better than any comparable surviving medium and secondly their character as works of artisan production closely linked to their architectural context
