Discourse Analysis and Evaluation ,2022-02-28 Functional approaches to the study of language may not only be used to characterize discourse structures but also to assess their communicative quality In fact discourse analysis and evaluation are conceptually related activities In this volume the link between analysis and evaluation is explored in seven studies discussing a variety of discourse genres like package inserts telephone openings survey interviews meetings government brochures and direct mail letters The analytical concepts used stem from different strands of research into language including cognitive linguistics pragmalinguistics conversational analysis and persuasion research   Handbook of Interview Research Jaber F. Gubrium,James A. Holstein,2002 The Handbook of Interview Research is the most ambitious attempt yet at examining the place of the interview in contemporary society Interviewing is the predominant mode of research in the social sciences It s also the stock in trade of information seekers in organizations and institutions of all kinds as well as in the mass media Across the board interviews provide today s leading window on the world of experience The Handbook offers a comprehensive examination of the interview at the cutting edge of information technology Drawing upon leading experts from a wide range of professional disciplines this book addresses conceptual and technical challenges that confront both academic researchers and interviewers with more applied goals From interview theory to the nuts and bolts of the interview process the coverage is impressively broad and authoritative The Handbook of Interview Research is both encyclopedic and thematic As an encyclopedia it provides extensive discussions of the methodological issues now surrounding interview practice offering a multi faceted assessment of what has become the method of choice for obtaining personal information in today s society But the Handbook also is a story which spins a particular tale of interviewing one that moves from the commonly recognized individual interview to what is called the interview society The gist of the presentation is that we can no longer regard the interview as simply an instrument for gathering data but must now also view it an integral part of society   **The SAGE Handbook of Interview Research** Jaber F. Gubrium,James A. Holstein,Amir B. Marvasti,Karyn D. McKinney,2012-02-14 The new edition of this landmark volume emphasizes the dynamic interactional and reflexive dimensions of the research interview Contributors highlight the myriad dimensions of complexity that are emerging as researchers increasingly frame the interview as a communicative opportunity as much as a data gathering format The book begins with the history and conceptual transformations of the interview which is followed by chapters that discuss the main components of interview practice Taken together the contributions to The SAGE Handbook of Interview Research The Complexity of the Craft encourage readers simultaneously to learn the frameworks and technologies of interviewing and to reflect on the epistemological foundations of the interview craft   **Fundamentals of Marketing Research** Scott M. Smith,Gerald S. Albaum,2005 Fundamentals of Marketing Research covers all facets of marketing research including method

technique and analysis at all levels The methodological scope regarding research design data collection techniques and measurement is broad with three chapters devoted to the critical area of measurement and scaling The presentation is from primarily a pragmatic and user oriented perspective which aides the student to evaluate the research presented to them This text explores cutting edge technologies and new horizons while ensuring students have a thorough grasp of research fundamentals *Nonresponse in Social Science Surveys* National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on a Research Agenda for the Future of Social Science Data Collection,2013-10-26 For many household surveys in the United States responses rates have been steadily declining for at least the past two decades A similar decline in survey response can be observed in all wealthy countries Efforts to raise response rates have used such strategies as monetary incentives or repeated attempts to contact sample members and obtain completed interviews but these strategies increase the costs of surveys This review addresses the core issues regarding survey nonresponse It considers why response rates are declining and what that means for the accuracy of survey results These trends are of particular concern for the social science community which is heavily invested in obtaining information from household surveys The evidence to date makes it apparent that current trends in nonresponse if not arrested threaten to undermine the potential of household surveys to elicit information that assists in understanding social and economic issues The trends also threaten to weaken the validity of inferences drawn from estimates based on those surveys High nonresponse rates create the potential or risk for bias in estimates and affect survey design data collection estimation and analysis The survey community is painfully aware of these trends and has responded aggressively to these threats The interview modes employed by surveys in the public and private sectors have proliferated as new technologies and methods have emerged and matured To the traditional trio of mail telephone and face to face surveys have been added interactive voice response IVR audio computer assisted self interviewing ACASI web surveys and a number of hybrid methods Similarly a growing research agenda has emerged in the past decade or so focused on seeking solutions to various aspects of the problem of survey nonresponse the potential solutions that have been considered range from better training and deployment of interviewers to more use of incentives better use of the information collected in the data collection and increased use of auxiliary information from other sources in survey design and data collection Nonresponse in Social Science Surveys A Research Agenda also documents the increased use of information collected in the survey process in nonresponse adjustment
