How the Neolithics Influenced Rock 'n' Roll Andrew Johnstone,2010-10-13 This book sets out to explore the connections between megalithic monuments and Rock n Roll music by first addressing what the megalithic structures would have originally meant to the builders and users of these sites and at the statements they were making at that time It then looks at how Rock n Roll artists have incorporated images of these monuments into album cover designs by looking at specific examples in an attempt to understand why despite being separated by millennia from the original builders they chose to use such places to represent the statements they are making through their music in the late 20th and early 21st centuries

Experimental Archaeology and Neolithic Architecture John Hill,2024-03-04 Our understanding of the construction processes involved with British Neolithic architecture needs further investigation The people were preliterate and there is no archaeological evidence of written or pictorial information regarding construction So how could they build complex monuments like Stonehenge without a plan This book argues that the Neolithic builders used rudimentary techniques to plan before building their monuments circa 4000 2500 BC essentially using ropes to set out the physical design of any structure they intended to build whilst finger reckoning numeracy dictated how their measured ropes were folded to position the monument s features Finally they used the sun s shadow at midday to achieve orientation To support this premise the book offers both the results of the author s rope experiments and instructions for repeating them Importantly this form of experimental archaeology delivers a unique approach for understanding the nature of complex Neolithic architecture Essentially the book explains the mental processes involved between design and construction
