The Heritage of Soviet Oriental Studies Michael Kemper, Stephan Conermann, 2011-02-01 This book examines the Russian Soviet intellectual tradition of Oriental and Islamic studies which comprised a rich body of knowledge especially on Central Asia and the Caucasus The Soviet Oriental tradition was deeply linked to politics probably even more than other European Orientalisms It breaks new ground by providing Western and post Soviet insider views especially on the features that set Soviet Oriental studies apart from what we know about its Western counterparts for example the involvement of scholars in state supported anti Islamic agitation the early and strong integration of Orientals into the scientific institutions the spread of Oriental scholarship over the Oriental republics of the USSR and its role in the Marxist reinterpretation of the histories of these areas The authors demonstrate the declared emancipating agenda of Soviet scholarship with its rhetoric of anti colonialism and

anti imperialism made Oriental studies a formidable tool for Soviet foreign policy towards the Muslim World and just like in the West the Iranian Revolution and the mujahidin resistance to the Soviet occupation of Afghanistan necessitated a thorough redefinition of Soviet Islamic studies in the early 1980s Overall the book provides a comprehensive analysis of Soviet Oriental studies exploring different aspects of writing on Islam and Muslim history societies and literatures It also shows how the legacy of Soviet Oriental studies is still alive especially in terms of interpretative frameworks and methodology after 1991 Soviet views on Islam have contributed significantly to nation building in the various post Soviet and Russian Muslim republics

Reassessing Orientalism Michael Kemper,Artemy M. Kalinovsky,2015-02-11 Orientalism as a concept was first applied to Western colonial views of the East Subsequently different types of orientalism were discovered but the premise was that these took their lead from Western style orientalism applying it in different circumstances This book on the other hand argues that the diffusion of interpretations and techniques in orientalism was not uni directional and that the different orientologies Western Soviet and oriental orientologies were interlocked in such a way that a change in any one of them affected the others that the different orientologies did not develop in isolation from each other and that importantly those being orientalised were active not passive players in shaping how the views of themselves were developed

The Birth of the Soviet Secret Police Boris Volodarsky,2023-05-31 This book is new in every aspect and not only because neither the official history nor an unofficial history of the KGB and its many predecessors and successors exists in any

language In this volume the author deals with the origins of the KGB from the Tsarist Okhrana the first Russians secret political police to the OGPU Joint State Political Directorate one of the KGB predecessors between 1923 and 1934 Based on documents from the Russian archives the author clearly demonstrates that the Cheka and GPU OGPU were initially created to defend the revolution and not for espionage The Okhrana operated in both the Russian Empire and abroad against the revolutionaries and most of its operations presented in this book are little known The same is the case with regards to the period after the Cheka was established in December 1917 until ten years later when Trotsky was expelled from the Communist Party and exiled and Stalin rose to power For the long period after the Revolution and up to the Second World War and indeed beyond until the death of Stalin the Cheka s main weapon was terror to create a general climate of fear in a population In the book the work of the Cheka and its successors against the enemies of the revolution is paralleled with British and American operations against the Soviets inside and outside of Russia For the first time the creation of the Communist International Comintern is shown as an alternative Soviet espionage organization for wide scale foreign propaganda and subversion operations based on the new revelations from the Soviet archives Here the early Soviet intelligence operations in several countries are presented and analyzed for the first time as are raids on the Soviet missions abroad The Bolshevik smuggling of the Russian imperial treasures is shown based on the latest available archival sources with misinterpretations and sometimes false interpretations in existing literature revised After the Bolshevik revolution Mansfield Smith Cumming the first chief of SIS undertook to set up an entirely new Secret Service organization in Russia During those first ten years events would develop as a non stop struggle between British intelligence within Russia and abroad and the Cheka later GPU OGPU Before several show spy trials in 1927 British intelligence networks successfully operated in Russia later moving to the Baltic capitals Finland and Sweden while young Soviet intelligence officers moved to London Paris Berlin and Constantinople Many of those operations from both sides are presented in the book for the first time in this ground breaking study of the dark world of the KGB

The Steppe and the Sea Thomas T. Allsen, 2019-05-03 In 1221 in what we now call Turkmenistan a captive held by Mongol soldiers confessed that she had swallowed her pearls in order to safeguard them She was immediately executed and eviscerated On finding several pearls Chinggis Qan Genghis Khan ordered that they cut open every slain person on the

battlefield Pearls valued for aesthetic economic religious and political reasons were the ultimate luxury good of the Middle Ages and the Chingissid imperium the largest contiguous land empire in history was their unmatched collector promoter and conveyor Thomas T Allsen examines the importance of pearls as luxury good and political investment in the Mongolian empire from its origin in 1206 through its unprecedented expansion to its division and decline in 1370 in order to track the varied cultural and commercial interactions between the northern steppes and the southern seas Focusing first on the acquisition display redistribution and political significance of pearls Allsen shows how the very act of forming such a vast nomadic empire required the massive accumulation management and movement of prestige goods and how this process brought into being new regimes of consumption on a continental scale He argues that overland and seaborne trade flourished simultaneously forming a dynamic exchange system that moved commodities from east to west and north to south including an enormous quantity of pearls Tracking the circulation of pearls across time he highlights the importance of different modes of exchange booty taking tributary relations market mechanisms and reciprocal gift giving He also sheds light on the ways in which Mongols marketing strategies made use of not only myth and folklore but also maritime communications networks created by Indian Buddhist and Muslim merchants skilled in cross cultural commerce In Allsen s analysis pearls illuminate Mongolian exceptionalism in steppe history the interconnections between overland and seaborne trade recurrent patterns in the employment of luxury goods in the political cultures of empires and the consequences of such goods for local and regional economies
