Theory and Methods in Comparative Policy Analysis Studies Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-09 Volume One of the Classics of Comparative Policy Analysis Theory and Methods in Comparative Policy Analysis Studies includes chapters that apply or further theory and methodology in the comparative study of public policy in general and policy analysis in particular Throughout the volume the chapters engage in theory building by assessing the relevance of theoretical approaches drawn from the social sciences as well as some which are distinctive to policy analysis Other chapters focus on various comparative approaches based on developments and challenges in the methodology of policy analysis Together this collection provides a comprehensive scholastic foundation to comparative policy analysis and comparative policy studies Theory and Methods in Comparative Policy Analysis Studies will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be learned or facilitated through methodologically and theoretically sound approaches The chapters were originally published as articles in the Journal of Comparative Policy Analysis which in the last two decades has pioneered the development of comparative public policy The volume is part of a four volume series the Classics of Comparative Policy Analysis including Theories and Methods Institutions and Governance Regional Comparisons

and Policy Sectors Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy political science public administration governance and policy design authored by the JCPA co editors Giliberto Capano Iris Geva May Michael Howlett Leslie A Pal and B Guy Peters

Developmental Science and the Holistic Approach Lars R. Bergman, Robert B. Cairns, Lars-Goran Nilsson, Lars Nystedt, 2000-01-01 This book is the outcome of a symposium where leading researchers mainly in developmental psychology came together to discuss the implications of the emerging developmental science and the holistic approach In doing this the authors wanted to honor a distinguished colleague David Magnusson and his career long contributions to this field The purpose of the book is to discuss the profound implications for developmental science of the holistic paradigm especially with regard to the individual development within psychology Against the background of their own empirical theoretical or methodological research the authors have tried to identify what is needed for the developmental theory and methods within this paradigm and discuss possibilities and limitations in relation to conventional approaches

Decision-Making Under Stress Rhona Flin, Eduardo Salas, Michael Straub, Lynne Martin, 2017-03-02 In our high technology society there is a growing demand for a better understanding of decision making in high risk situations in order to improve selection training and operational performance Decision Making Under Stress presents a state of the art review of psychological theory in research and practice on decision making in high pressure and emergency situations It focuses on the experienced decision makers who deal with such risks principally on flight decks at civil emergencies in industrial settings and military environments The 29 chapters cover a wide range of perspectives and applications from aviation military industry and the emergency services The authors all international invited experts in their field are based in research centers and universities from Europe North America and Australia Their common interest is in the theories and methods of a new research domain called NDM naturalistic decision making This volume comprises the edited contributions to the Third International NDM conference sponsored by the US Army Research Institute and the US Naval Air Warfare Center which was held in Aberdeen Scotland in September 1996 The NDM researchers are interested in decision making in situations characterised by high risk time pressure uncertain goals ambiguous information and teamwork The extent to which the NDM approach can explain and predict human performance in such settings is a central theme discussed with many practical examples and applications This book is essential reading for applied psychologists pilots emergency commanders military officers high hazard managers safety and emergency response professionals

Valsiner: Handbook of Developmental (c) Psychology Jaan Valsiner Kevin J. Connolly, This is an impressive work and will provide the advanced reader with a rich source of theory and evidence There is a huge amount to be got from the book and I suspect it will become a key work J Gavin Bremner Department of Psychology Lancaster University The Handbook of Developmental Psychology is a comprehensive authoritative yet frontier pushing overview of the study of human development presented in a single volume format It is ideal for experienced individuals wishing for an up to date survey of

the central themes prevalent to developmental psychology both past and present and for those seeking a reference work to help appreciate the subject for the first time The insightful contributions from world leading developmental psychologists successfully and usefully integrate different perspectives to studying the subject following a systematic life span structure from pre natal development through to old age in human beings The Handbook then concludes with a substantive section on the methodological approaches to the study of development focusing on both qualitative and quantitative techniques This unique reference work will be hugely influential for anyone needing or wishing for a broad yet enriched understanding of this fascinating subject It will be a particularly invaluable resource for academics and researchers in the fields of developmental psychology education parenting cultural and biological psychology and anthropology

Sociogenetic Perspectives on Internalization Brian D. Cox, Cynthia Lightfoot, 2013-05-13 The issue of how the external world becomes part of the behavioral repertoire of children has been important to psychology from its very beginning preoccupying theorists from Sigmund Freud to George Herbert Mead But ever since Lev Vygotsky claimed that every function in a child's activity appears first as a process in the social realm between individuals and moves to a process that individual children can accomplish relatively independently there has been increased debate as to exactly how this process of internalization happens In contemporary developmental psychology the process of internalization has become so important that the time is ripe for a book which explicitly addresses the problems it poses Although the chapters in this book deal with age groups from preschool to adolescence and topics from mathematics to storytelling and from taking risks to making moral judgments there is one core question which unifies them all If the growing competence of a child is truly sociogenetic if it truly grows out from is supported by and is dependent upon the social where is that competence truly located Bearing a variety of labels cultural historical co constructionist dialectical contextualist narrative hermeneutic and discursive psychologies and analytic constructs scaffolding proleptic instruction participation appropriation and situated activity contemporary perspectives are showing clear signs of development and differentiation This volume's goal is to help bring some order to these differences without denying either the usefulness of this variety or the importance of the differences among perspectives This new book illuminates these differences by collecting a select sample of theory and research into one of two major sections The first section includes work undertaken from a social interactive perspective The overarching aim is to identify processes of child child or child adult interactions as they emerge over relatively short periods of time Typically the methodology involves the microanalysis of videotaped interactions Development is situated literally within social interactions which are considered directly responsible for children's development The second section provides a sample of work representing a symbolic action perspective This one is not oriented toward social interactions but toward the symbolic meanings that they express and that children impose on them The dominant methodology is interpretive or hermeneutic and the goal is to articulate the figurative metaphoric processes and narrative structures that inhabit social actions and from which they draw their meaning and

coherence *Applied Data Analytic Techniques For Turning Points Research* Patricia Cohen, 2012-10-12 This innovative volume demonstrates the use of a range of statistical approaches that examine turning points a change in direction magnitude or meaning in real data Analytic techniques are illustrated with real longitudinal data from a variety of fields As such the book will appeal to a variety of researchers including Developmental researchers interested in identifying factors precipitating turning points at various life stages Medical or substance abuse researchers looking for turning points in disease or recovery Social researchers interested in estimating the effects of life experiences on subsequent behavioral changes Interpersonal behavior researchers looking to identify turning points in relationships Brain researchers needing to discriminate the onset of an experimentally produced process in a participant The book opens with the goals and theoretical considerations in defining turning points An overview of the methods presented in subsequent chapters is then provided Chapter goals include discriminating local from long term effects identifying variables altering the connection between trajectories at different life stages locating non normative turning points coping with practical distributional problems in trajectory analyses and changes in the meaning and connections between variables in the transition to adulthood From an applied perspective the book explores such topics as antisocial aggressive trajectories at different life stages the impact of imprisonment on criminal behavior family contact trajectories in the transition to adulthood sustained effects of substance abuse alternative models of bereavement and identifying brain changes associated with the onset of a new brain process Ideal for advanced students and researchers interested in identifying significant change in data in a variety of fields including psychology medicine education political science criminology and sociology *Annals of Theoretical Psychology* Paul Van Geert, Leendert P. Mos, William J. Baker, 2013-11-11 As a follow up to Volume 7 contributors continue to explore the latest developments in developmental psychology Here researchers focus on the integration of theory and research and evaluates theoretical progress and advanced research Continuing with the successful format of previous volumes in Annals of Theoretical Psychology Volume 10 presents four major contributions each accompanied by commentaries and replies to commentaries *Handbook of Psychology, Developmental Psychology* Irving B. Weiner, Richard M. Lerner, M. Ann Easterbrooks, Jayanthi Mistry, 2012-10-16 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field This ten year revision now covers discoveries based in neuroscience clinical psychology's new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology *Lives in Time and Place* R. A. Settersten, 2018-10-04 Time and place are of the greatest significance for scientific inquiry about human lives As we seek to better understand the nature and rhythm of the life course in modern societies its effective analysis and explanation simultaneously becomes more pressing and more

complicated This information is crucial for developing and reforming social policies services and interventions aimed at improving human development and welfare Yet as our scientific treatments have become more elaborate they have also become more fragmented within and between academic disciplines across the study of specific life periods and by method

Culture and the Development of Children's Action Jaan Valsiner, 1997-06-23 In this deeply probing intellectually challenging work Dr Jaan Valsiner lays the groundwork for a dynamic new cultural historical approach to developmental psychology He begins by deconstructing traditional developmental theory exposing the conceptual confusion and epistemological blind spots that he believes continue to undermine the scientific validity of its methodologies He describes the ways in which embedded cultural biases shape interventional goals and influence both the direction research takes and the ways in which research data are interpreted And he suggests ways in which researchers and clinicians can become more aware of and transcend those biases Dr Valsiner then develops a hierarchical systemic model that portrays development as an open ended dialectical process Central to Valsiner's approach is the premise that since each child is unique as are his or her life conditions deviations in function or the rate of development from a prescribed norm are just as likely to be constructive adaptations to changing environmental pressures as symptoms of psychological disorder Drawing upon sources as varied as linguistic philosophy structural anthropology thermodynamics and systems theory as well as the work of many of the leading figures in twentieth century developmental theory Valsiner argues convincingly for an approach to developmental psychology mature enough to recognize the difference between healthy variability and dysfunction In later chapters the focus shifts from development in the abstract to the everyday challenges encountered by the developing child Case histories illustrate the subtle interplay of cultural physiological and psychological factors in shaping childhood behavior Called an intellectual tour de force by the Bulletin of the Menninger Clinic *Culture and the Development of Children's Action* is important reading for developmental psychologists child psychologists and all child clinicians Of course no science progresses in a linear fashion It moves interdependently with the society in which it is embedded making use of the narrative forms in describing itself to its insiders and outsiders The rhetoric of scientists about their science is therefore necessarily inconsistent Sciences are both social institutions within a society and social organizations that attempt to build universal knowledge It is a complicated task for psychology to be both knowledge constructing and self reflexive at the same time Nevertheless it is the latter kind of reflexivity that guides the actual construction of knowledge Jaan Valsiner This book is a fascinating and important work that challenges much of contemporary developmental psychology The Second Edition has changed in a number of respects and much new material has been added but at root Valsiner grapples with the question how shall we understand development He continues to struggle also with what he describes rather vividly as the epistemological windmills of psychology His challenge is summed up succinctly in two lines from a poem by T S Eliot Where is the wisdom we have lost in knowledge Where is the knowledge we have lost in information from the Foreword by Kevin Connolly Beyond the Mind

Giuseppina Marsico,2018-04-01 This book *Beyond the Mind Cultural Dynamics of the Psyche* is unusual in the content and in the format That's why it requires an unusual look It has to do with a man an intellectual journey and with uncountable travels across the world over the last two decades This man is Jaan Valsiner and here you will read of his restless effort of elaborating ideas while going in different places as invited keynote This book is mainly about his intellectual trajectory which touches several places and several and interconnected topics This book is about the minutes of his bigger and well organized works and also it is a collection of only apparently fragmented texts mainly keynote lectures unpublished or rejected papers where the readers will see the step by step elaboration over the years of new ideas theories models and even schemas which Jaan likes very much maybe especially as he claims basic inability to draw anything

Lifespan Developmental Systems

Ellen A. Skinner,Thomas Kindermann,Andrew Mashburn,2019-05-09 Everything you always wanted to know about theories meta theories methods and interventions but didn't realize you needed to ask This innovative textbook takes advanced undergraduate and graduate students behind the curtain of standard developmental science so they can begin to appreciate the generative value and methodological challenges of a lifespan developmental systems perspective It envisions applied developmental science as focused on ways to use knowledge about human development to help solve societal problems in real life contexts and considers applied developmental research to be purpose driven field based community engaged and oriented toward efforts to optimize development Based on the authors more than 25 years of teaching this text is designed to help researchers and their students intentionally create a cooperative learning community full of arguments doubts and insights that can facilitate their own internal paradigm shifts one student at a time With the aid of extensive online supplementary materials students of developmental psychology as well as students in other psychological subdisciplines such as industrial organizational social and community psychology and applied professions that rely on developmental training such as education social work counseling nursing health care and business will find this to be an invaluable guidebook and toolbox for conceptualizing and studying applied problems from a lifespan developmental systems perspective

Understanding Early Adolescent Self and Identity Thomas M. Brinthaupt,Richard P. Lipka,2012-02-01 What are the major self and identity concerns for early adolescents What are the applications and interventions that can address those concerns helping to ease the transition into later adolescence and adulthood Providing a broad and interdisciplinary approach to studying the self the contributors emphasize the practical implications of their work for understanding early adolescent self and identity and for designing interventions that facilitate development and adjustment The book consists of four major sections in which contributors address conceptual issues school transitions peer and behavioral problems and intervention programs

Development of Person-context Relations Thomas A. Kindermann,Jaan Valsiner,2013-06-17 Traditionally developmental psychology has its focus on individuals Developmentalists aim to describe regularities in individuals change and development across time to explain the processes and mechanisms that are involved in producing change and regularity

and eventually to design strategies for optimization and modification of developmental pathways Although the role of contexts has always been of central concern for these purposes it is nevertheless quite surprising to note that compared to the effort devoted to individuals relatively little attention has been paid to the study of the nature and organization of their contexts This volume is an exploration of the idea that how we describe and explain human development will be closely tied to our understanding of what contexts are how individuals and contexts become influential for one another what contexts do to and with individuals and how contexts and their influences change themselves across time A major theme is whether the traditional dichotomy between individuals and their contexts may be artificial perhaps culturally biased and after psychologists have adhered to it for about a century may have become an impediment to increasing our understanding of developmental processes With this volume the editors contribute a serious consideration of development and systematic change to emerging models of person context relations and provide suggestions about how it may be possible to incorporate these notions in developmental research and theorizing
