Women in American Operas of the 1950s Monica A. Hershberger, 2023 The first feminist analysis of some of the most performed works in the American opera canon emphasizing the voices and perspectives of the sopranos who brought these operas to life In the 1950s composers and librettists in the United States were busy seeking to create an opera repertory that would be deeply responsive to American culture and American concerns They did not break free however of the age old paradigm so typically expressed in European opera that is of women as either saintly and pure or sexually corrupt with no middle ground As a result in American opera of the 1950s women risked becoming once again opera's inevitable victims Yet the sopranos who were tasked with portraying these paragons of virtue and their opposites did not always take them as their composers and librettists made them Sometimes

they rewrote through their performances the roles they had been assigned Sometimes they used their lived experiences to invest greater authenticity in the roles With chapters on *The Tender Land* *Susannah* *The Ballad of Baby Doe* and *Lizzie Borden* this book analyzes some of the most performed yet understudied works in the American opera canon It acknowledges Catherine Clement's famous description of opera as the undoing of women while at the same time illuminating how singers like Beverly Sills and Phyllis Curtin worked to resist such undoing years before the official resurgence of the American feminist movement In short they ended up helping to dismantle powerful gendered stereotypes that had often reigned unquestioned in opera houses until then *Childhood Disability and Family Systems* Michael Ferrari, Marvin B.

Sussman, 2016-01-08 First published in 1987 this book focuses on childhood disability within the family It examines the very nature of disability itself as well as many of the fundamental elements of families The book was written at a time when the meaning level of disability and its effect on family and society were rapidly changing and people with disabilities were starting to benefit from opportunities to compensate for whatever disabilities they may have had Modern technology and an affluent society afforded advantages to support many of its disabled members Contributors examine the contemporary context of disability the cost of disability to families ethical philosophical and social issues underlying the treatment and rehabilitation of children with severe disabilities and the role of professionals amongst other topics This book will be of interest to those involved in teaching research and direct care with families who have children with disabilities Although written in the late 80s the work discusses subjects that are still vital today **The Harvard Biographical Dictionary of**
