Stalinist Architecture:

Architecture of the Stalin Era Alexei Tarkhanov, Sergei Kavtaradze, 1992 **Stalinist Architecture** Alexei

Tarkhanov, Sergei Kavtaradze, 1992 This is a collection of contemporary paintings plans and drawings of Stalinist architecture The architectural competitions of the era were tools in the propagandistic mass culture which served as a form of control and this book uses these to chart developments and changes in architectural style *Stalin's Architect* Deyan Sudjic, 2022-06-14

The story of Boris Iofan designer of the iconic but unbuilt Palace of the Soviets whose buildings came to define the language of Soviet architecture What would an architect do for the chance to build the tallest building in the world What would he sacrifice to stay alive in the midst of Stalin's murderous purges This is the first major publication on the remarkable life and career of Boris Iofan 1891-1976 state architect to Joseph Stalin Iofan's story is an insight into the troubled relationship of all successful architects with power A gifted designer and a committed Communist Iofan became the Soviet Union's most celebrated architect after Alexei Rykov Lenin's successor persuaded him to return to Moscow from Rome with his aristocratic wife Olga Sasso Ruffo Iofan was at the heart of political life in the Soviet Union and his work is key to understanding its official culture When Stalin's henchmen crushed the architectural avant garde it was Iofan who created the new national style from the grand projects he realized including the House on the Embankment a megastructure of 505 homes for the Soviet elite to even more ambitious unbuilt projects in particular the Palace of the Soviets a baroque Stalinist dream whose image was reproduced throughout the Soviet Union His career took him to New York and Paris and to the destroyed city of Stalingrad He was a friend of Frank Lloyd Wright a rival of Le Corbusier Walter Gropius and Erich Mendelsohn and an enemy of Hitler's architect Albert Speer whose Nazi pavilion faced Iofan's Soviet one at the Paris Expo in 1937 He kept silent when Stalin executed his friends including Rykov he also sacrificed his own talent by following the dictator's instructions to the letter in creating the regime's landmarks Generously illustrated with a wide range of previously unpublished material this book is an exploration of architecture as an instrument of statecraft It is an insight into the key moments of 20th century politics and culture from a unique perspective and the personal story of a remarkable individual who witnessed many of the most dramatic turning points of modern history **Morality and Architecture Revisited** David Watkin, 2001-08

When *Morality and Architecture* was first published in 1977 it received passionate praise and equally passionate criticism An editorial in *Apollo* entitled *The Time Bomb* claimed that it deserved to become a set book in art school and University art history departments and the *Times Literary Supplement* savaged it as an example of that kind of vindictiveness of which only Christians seem capable Here for the first time is the story of the book's impact In writing his groundbreaking polemic David Watkin had taken on the entire modernist establishment tracing it back to Pugin Viollet le Duc Corbusier and others who claimed that their chosen style had to be truthful and rational reflecting society's needs Any critic of this style was considered antisocial and immoral Only covertly did the giants of the architectural establishment support the author Watkin

gives an overview of what has happened since the book's publication arguing that many of the old fallacies still persist This return to the attack is a revelation for anyone concerned architecture's past and future *Morality and Architecture Revisited* contains the entire text of the book *Morality and Architecture* plus additional material by David Wakin on the controversy that the book created

Architecture of the Stalin Era Alexei Tarkhanov, Sergei Kavtaradze, 1992 *Stalinist City Planning* Heather D. DeHaan, 2013-01-01 Based on research in previously closed Soviet archives this book sheds light on the formative years of Soviet city planning and on state efforts to consolidate power through cityscape design Stepping away from Moscow's central corridors of power Heather D DeHaan focuses her study on 1930s Nizhnii Novgorod where planners struggled to accommodate the expectations of a Stalinizing state without sacrificing professional authority and power Bridging institutional and cultural history the book brings together a variety of elements of socialism as enacted by planners on a competitive urban stage such as scientific debate the crafting of symbolic landscapes and state campaigns for the development of cultured cities and people By examining how planners and other urban inhabitants experienced lived and struggled with socialism and Stalinism DeHaan offers readers a much broader more complex picture of planning and planners than has been revealed to date Dust jacket

[The Architecture of Historic Hungary](#) Pál Lővei, 1998 The first comprehensive survey in English of Hungarian architecture from prehistoric settlements to contemporary experiments Perhaps most revealing to Western readers are the illustrations and line drawings which document one of the most neglected but fascinating architectural traditions of Europe 305 illustrations 12 in color

Architecture of Oblivion Andreas Schönle, 2011-06-01 Despite attempts to promote the aesthetics of ruins in Russia from Catherine the Great's construction of fake ruins in imperial parks to Josef Brodsky's elegiac meditations ruins have never achieved the status they enjoy in Western Europe While the Soviet Union was notorious for leveling churches post Soviet Russia has only intensified the practice of massive destruction and reconstruction *Architecture of Oblivion* examines the role of ruins in the development of Russia's historical consciousness from the eighteenth century to the present Investigating the meaning and functions ruins have acquired in Russian culture Schönle looks at ideological reasons for the current disregard for the value of ruins and historical buildings in particular by political authorities and reveals how ruins have often become a site of resistance to official ideology and an invitation to map out alternative visions of history and of statehood An interdisciplinary study of Russia's response to ruins has never been attempted although the topic of ruins has garnered considerable interest in Western Europe and in the U S This original work from a leading authority on the subject will appeal to historians of Russian culture and thought literature and art scholars and general readers interested in ruins

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the *Encyclopedia of 20th Century Architecture* website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural

achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries The Landscape of Stalinism Evgeny Dobrenko, Eric Naiman, 2011-11-15 This wide ranging cultural history explores the expression of Bolshevik Party ideology through the lens of landscape or more broadly space Portrayed in visual images and words the landscape played a vital role in expressing and promoting ideology in the former Soviet Union during the Stalin years especially in the 1930s At the time the iconoclasm of the immediate postrevolutionary years had given way to nation building and a conscious attempt to create a new Soviet culture In painting architecture literature cinema and song images of landscape were enlisted to help mold the masses into joyful hardworking citizens of a state with a radiant utopian future all under the fatherly guidance of Joseph Stalin From backgrounds in history art history literary studies and philosophy the contributors show how Soviet space was sanctified coded and sold as an ideological product They explore the ways in which producers of various art forms used space to express what Katerina Clark calls a cartography of power an organization of the entire country into a hierarchy of spheres of relative sacredness with Moscow at the center The theme of center versus periphery figures prominently in many of the essays and the periphery is shown often to be paradoxically central Examining representations of space in objects as diverse as postage stamps a hikers magazine advertisements and the Soviet musical the authors show how cultural producers attempted to naturalize ideological space to make it an unquestioned part of the worldview Whether focusing on the new or the centuries old whether exploring a built cityscape a film documentary or the painting Stalin and Voroshilov in the Kremlin the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination Not all features of Soviet space were entirely novel and several of the essayists assert continuities with the prerevolutionary past One example is the importance of the mother image in mass songs of the Stalin period another is the boundless longing inspired in the Russian character by the burden of living amid vast empty spaces But whether focusing on the new or the centuries old whether exploring a built cityscape a film documentary or the painting Stalin and Voroshilov in the Kremlin the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination A History of Russian Exposition and Festival Architecture Alla Aronova, Alexander Ortenberg, 2018-10-03 This collection of thirteen vignettes addresses several important episodes in the history of Russian temporary architecture and public art from the royal festivals during the times of Peter the Great up to the recent venues including the Sochi Winter Olympics The forms and the circumstances of their design were drastically different however the projects discussed in the book share a common feature they have been instrumental in the construction of Russia's national identity with its perception of the West simultaneously a foe and a paragon looming high over this process The book offers a history of multidirectional relationships between diplomacy propaganda and architecture **The Legacy of the Siege of Leningrad, 1941-1995** Lisa A.

Kirschenbaum, 2009-10-19 The siege of Leningrad constituted one of the most dramatic episodes of World War II one that individuals and the state began to commemorate almost immediately Official representations of heroic Leningrad omitted and distorted a great deal Nonetheless survivors struggling to cope with painful memories often internalized even if they did not completely accept the state's myths and they often found their own uses for the state's monuments Tracing the overlap and interplay of individual memories and fifty years of Soviet mythmaking this book contributes to understandings of both the power of Soviet identities and the delegitimizing potential of the Soviet Union's chief legitimizing myths Because besieged Leningrad blurred the boundaries between the largely male battlefield and the predominantly female home front it offers a unique vantage point for a study of the gendered dimensions of the war experience urban space individual memory and public commemoration

Art of the Soviets Matthew Cullerne Bown, Brandon Taylor, 1993 This work considers aspects of the art and architecture of the Soviet Union during the turbulent period of 1917 to 1922 covering a broad range of art some modernist some anti modernist but all to some degree guided by and sometimes coerced by the apparatus of the overarching state

Architecture Henry-Russell Hitchcock, 1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the modern styles of the era based on traditions of the past and finally in the 20th century Art Nouveau and the modern architects in their generations Perret Wright Gropius Corbusier Mies van der Rohe and others in many parts of the world

The Culture of the Stalin Period Hans Gunther, 1990-04-09 Up to now the culture of the Stalin period has been studied mainly from a political or ideological point of view In this book renowned specialists from many countries approach the problem rather from inside The authors deal with numerous aspects of Stalinist culture such as art literature architecture film and popular culture Yet the volume is more than a mere collection of studies on special issues It is an inquiry into the very nature of a certain type of culture its symbols rites and myths The book will be useful not only for students of Soviet culture but also for a wider audience

Soviet Architectural Avant-Gardes Danilo Udovicki-Selb, 2020-05-14 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin's totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the

history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright s triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin s Terror **The Stalin Years**

Evan Mawdsley,2003-09-06 Looking at the entire Stalin era this book contains chapters on ideology politics economic development social change nationalities culture and external relations and the Great Terror An updated bibliography including a wealth of recent English language work on the rule of Stalin is included Time and Material Culture Julie Deschepper,Antony Kalashnikov,Federica Rossi,2024-07-05 This edited volume offers an original exploration into the ways in which Soviet culture and experience of time were unique examining the temporalities expressed in the world of socialist things from the objects of everyday life to urban architecture Grounding the analysis of Soviet temporalities in their material incarnations not only lends concreteness to discussions of temporal culture but also draws out ways in which the specificities of Soviet things and their planning design manufacture and consumption mediated and produced particular ways of experiencing perceiving and representing time As such Time and Material Culture turns a new page in the study of the temporal and material culture of Soviet socialism and in doing so contributes to broader debates on the changing experiences of time in the global twentieth century The book integrates interdisciplinary perspectives as well as regional approaches sensitive to the multinational nature of the Soviet project Time and Material Culture will be useful to academics upper level undergraduates and graduate students interested in twentieth century cultures of time Medieval Art, Modern Politics Brigitte Buettner,William J. Diebold,2024-12-16 Medieval Art Modern Politics is an innovative volume of twelve essays by international scholars prefaced by a comprehensive introduction It examines the political uses and misuses of medieval images objects and the built environment from the 16th to the 20th century In case studies ranging from Russia to the US and from catacombs mosques cathedrals and feudal castles to museums and textbooks it demonstrates how the artistic and built legacy has been appropriated in post medieval times to legitimize varied political agendas whether royalist imperial fascist or colonial Entities as diverse as the Roman papacy the Catholic Church local arts organizations private owners of medieval fortresses or organizers of exhibitions and publishers are examined for the multiple ways they co opt medieval works of art Medieval Art Modern Politics enlarges the history of revivalism and of medievalism by giving it a uniquely political twist demonstrating the unavoidable but often ignored intersection of art history knowledge and power
