Corbett,2005-09-15 This pioneering book provides a full length study of inflectional syncretism presenting a typology of its occurrence across a

wide range of languages **Historical Linguistics 2015** Michela Cennamo,Claudia Fabrizio,2019-09-15 The collection of articles presented in this volume addresses a number of general theoretical methodological and empirical issues in the field of Historical Linguistics in different levels of analysis and on different themes i phonology ii morphology iii morphosyntax iv syntax v diachronic typology vi semantics and pragmatics and vii language contact variation and diffusion The topics discussed often in a comparative perspective feature a variety of languages and language families and cover a wide range of research areas Novel analyses and often new diachronic data also from less known and under investigated languages are provided to the debate on the principles mechanisms paths and models of language change as well as the relationship between synchronic variation and diachrony The volume is of interest to scholars of different persuasions working on all aspects of language change *Discovering Albanian I Textbook* Linda Mëniku,Héctor Campos,2011-08-01 Approximately five million people worldwide speak Albanian The opening of Albania in the 1990s to broader trading and diplomatic relations with other nations has created a need for better knowledge of the language and culture of this country This book teaches the student to communicate in everyday situations in the language with each chapter introducing a new situational context Students learn to discuss work vacations health and entertainment Students also learn to practice basic skills such as shopping ordering tickets and renting an apartment Upon completing this textbook students will be at the A2 B1 level of proficiency on the scale provided by the Common European Framework of Reference for Languages CEFR The textbook includes eighteen lessons based on real life situations including three review lessons dialogues to help introduce vocabulary and grammatical structures comprehension questions and exercises related readings at the end of each chapter full translations for all examples discussed in grammar sections a series of appendixes with numerous charts summarizing main classes of nouns adjectives and verbs an appendix with the solutions to most of the exercises in the book a glossary with all the words in the dialogs and readings **BIBLIOGRAPHIE linguistique de l'année 1982** H. Borkent,J.J. Beylsmit,Mark Janse,1985-03-31 *Vocatives* Virginia Hill,2013-11-29 Vocatives proposes a formal syntactic approach to vocatives The analysis focuses on the internal structure of vocatives phrases and on the mechanism through which a vocative phrase connects with the clause Vocatives are nouns that encode conversational pragmatic features at their left periphery Any vocative phrase with this structure becomes the indirect object of a Speech Act head mapped at the left periphery of clauses This analysis has implications for the debate on whether pragmatic features are mapped into syntax and subsequently on how a grammar of direct address may look like Since particles of direct address imperatives and exclamations fall under the same umbrella of speech acts they all need re assessment from the same perspective This book is a tour de force Virginia Hill brings the vocative a category which had so far remained marginal and ill understood into main stream syntactic research by tying it in with recent progress in the study of the syntactization of pragmatic functions What used to be a fringe phenomenon will now be part of the core theory Liliane Haegeman Ghent University Virginia Hill has redrawn the syntax

pragmatics interface by nudging syntax into domains that are traditionally considered to be purely pragmatic in nature She has done this with sophisticated analysis and a breathtaking array of cross linguistic data Shigery Miyagawa Massachusetts Institute of Technology Vocatives are a fundamental yet strangely neglected aspect of the grammar of many languages General readers intrigued and perhaps puzzled by the nature of vocatives and how they are expressed cross linguistically will find this a very helpful and enlightening book Martin Maiden University of Oxford   Comparative Syntax of Balkan Languages María Luisa Rivero,Angelikē Rallē,2001 This collection of seven papers studies important aspects of the syntax of Albanian Bulgarian Greek and Romanian from a comparative perspective based on current linguistic frameworks including the Minimalist Program Topics addressed include control raising and obviation negation noun phrase structure clitic pronouns and verb movement   **Spiritual Discourse** Frances Trix,1993 Far from Ottoman Turkey and the Balkans an expanded farmhouse in southern Michigan provides the secure if improbable setting for Baba Rexheb and his Islamic Bektashi community This is also the setting for Spiritual Discourse a study of the process by which Baba Rexheb a ninety year old Albanian leader of the Bektashi order and Frances Trix an American student who has studied with him for over twenty years come to share a common universe of experience and attunement The focus of the study is one lesson with Baba a lesson that is rich in poetry and parable narrative and face saving humor As Trix seeks to understand how Baba teaches she contextualizes the lesson internally in terms of episodes and dialogic patterns and externally in terms of the societal personal and ritual histories it presumes Overall what is being passed on is not facts but a relationship for the relationship of seeker and master mirrors that of human and God Yet on a more immediate level Baba teaches through a highly personalized recursive sort of language play that engenders current attention while constantly evoking an ever growing shared past For scholars of discourse and interaction the study contributes the central concept of language attunement A form of linguistic convergence that operates not at the level of speech community but rather at the level of dialogic encounter and that occurs most often among people who have long interacted For scholars of Islam and religious studies the study represents a rare application of sociolinguistics to transmission of spiritual knowledge The importance of oral interaction in such transmission has long been appreciated but the conceptual framework and methodology for its analysis have been lacking An ethnography of learning a sociolinguistics of mysticism above all Spiritual Discourse illuminates the process of interpersonal encounter It is a story gracefully and unpretentiously told   **A Gothic Etymological Dictionary** Winfried Lehmann,2024-03-11

Comparison and Gradation in Indo-European Götz Keydana,Wolfgang Hock,Paul Widmer,2021-06-08 The ability to compare is fundamental to human cognition Expressing various types of comparison is thus essential to any language The present volume presents detailed grammatical descriptions of how comparison and gradation are expressed in ancient Indo European languages The detailed chapters devoted to the individual languages go far beyond standard handbook knowledge Each chapter is structured the same way to facilitate cross reference and typological comparison The data are presented in a

top down fashion and in a format easily accessible to the linguistic community The topics covered are similatives equatives comparatives superlatives elatives and excessives Each type of comparison is illustrated with glossed examples of all its attested grammatical realizations The book is an indispensable tool for typologists historical linguists and students of the syntax and morphosyntax of comparison   *The Languages and Linguistics of Europe* Bernd Kortmann,Johan van der Auwera,2011-07-27 Open publicationThe Languages and Linguistics of Europe A Comprehensive Guide is part of the multi volume reference work on the languages and linguistics of the continents of the world The book supplies profiles of the language families of Europe including the sign languages It also discusses the areal typology paying attention to the Standard Average European Balkan Baltic and Mediterranean convergence areas Separate chapters deal with the old and new minority languages and with non standard varieties A major focus is language politics and policies including discussions of the special status of English the relation between language and the church language and the school and standardization The history of European linguistics is another focus as is the history of multilingual European empires and their dissolution The volume is especially geared towards a graduate and advanced undergraduate readership It has been designed such that it can be used as a whole or in parts as a textbook the first of its kind for graduate programmes with a focus on the linguistic and linguistics landscape of Europe   *Inflectional Defectiveness* Andrea D. Sims,2015-11-12 Paradigmatic gaps missing inflected forms have traditionally been considered to be the random detritus of a language s history and marginal exceptions to the normal functioning of its inflectional system Arguing that this is a misperception Inflectional Defectiveness demonstrates that paradigmatic gaps are in fact normal and expected products of inflectional structure Sims offers an accessible exploration of how and why inflectional defectiveness arises why it persists and how it is learned The book presents a theory of morphology which is rooted in the implicative structure of the paradigm This systematic exploration of the topic also addresses questions of inflection class organization the morphology syntax interface the structure of the lexicon and the nature of productivity Presenting a novel synthesis of established research and new empirical data this work is significant for researchers and graduate students in all fields of linguistics   *Encyclopedia of Indo-European Culture* J. P. Mallory,Douglas Q. Adams,1997 The Encyclopedia of Indo European Culture is a major new reference work that provides full inclusive coverage of the major Indo European language stocks their origins and the range of the reconstructed Proto Indo European language The Encyclopedia also includes numerous entries on archaeological cultures having some relationship to the origin and dispersal of Indo European groups as well as entries on some of the major issues in Indo European cultural studies There are two kinds of entries in the Encyclopedia of Indo European Culture a those that are devoted to archaeology culture or the various Indo European languages and b those that are devoted to the reconstruction of Proto Indo European words Entries may be accessed either via the General Index or the List of Topics Entries by Category where all individual reconstructed head forms can also be found Reference may also be made to the Language Indices In order to make the book

as accessible as possible to the non specialist the Editors have provided a list of Abbreviations and Definitions which includes a number of definitions of specialist terms primarily linguistic with which readers may not be acquainted As the writing systems of many Indo European groups vary considerably in terms of phonological representation there is also included a list of Phonetic Definitions With more than 700 entries written by specialists from around the world the Encyclopedia of Indo European Culture has become an essential reference text in this field
