Portfolio Society Ivan Ascher, 2016-09-10 As financial markets expand and continue to refashion the world in their own image the wealth of capitalist societies no longer presents itself as it did to Karl Marx in the nineteenth century as a monstrous collection of commodities Instead it appears as an equally monstrous collection of financial securities and the critique of political economy must proceed accordingly But what would it mean to write Capital in the twenty first century Are we really to believe that risk rather than labor is now regarded as the true fount of economic value Likewise can it truly be the case that the credit relation at least in the global North has replaced the wage relation as the key site of exploitation and political struggle And finally if precarity is indeed the name of today s proletarian condition what possible future does it actually portend what analysis does it require Through a series of creative substitutions Ascher s Portfolio Society extends Marx s critical project in bold and unexpected ways In this work Ascher demystifies crucial dimensions of contemporary finance and considers the predicaments of societies whose own future is now shaped by volatile financial markets In the end we may find that much has changed and much has not relations of domination still endure and mystifications do abound but the devil is in the details and that is where Ascher would have us dwell At once a critique of modern finance and of the societies under its spell Portfolio Society succeeds in revealing the potential limits of Capital while reveling still in its limitless potential
