ABC POWDER

Blue label fire extinguishers are sometimes known as "ABC" extinguishers because they can be used on Class A, B, and C fire types. However, powder fire extinguishers are therefore not recommended for use within small rooms, homes, and offices. Limited to engine rooms and outdoor machinery.

The standard dry powder can be used on some electrical fires, while the special dry powder extinguisher may be used on fires involving flammable metals.

WET CHEMICAL

Yellow labeled fire extinguishers are wet chemical-based extinguishers designed for Class F types of fires. It is important to note that Class F fires generally occur in professional kitchens and other spaces where oil is being heated to high temperatures. Although this type of fire extinguisher can be used for Class A type of fire, many businesses will mainly prefer water or foam extinguishers for this purpose.

DE-IONISED WATER MIST

De-ionised water mist fire extinguishers have a white label and are highly effective in classes A, B, and C and burning electrical equipment.

The unique design of the water mist extinguishers' supersonic nozzle creates a microscopic mist curtain, reducing the oxygen content. Water mist extinguishers are safe and well suited for use on burning electrical equipment as the de-ionized water mist does not conduct electricity and the water mist does not form puddles which could lead to electrocution.
