Vandervoort Walsh, 2022-07-21 Published during the Great Depression era the following book is intended to assist the readers in building their own small houses A small house here is determined not through its size but rather its cost it is expected that a house can be built with a maximum budget of 42 cents per cubic foot The Fractal Dimension of **Architecture** Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field. The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture. Through this process the book offers a unique mathematical insight into the history and theory of design. *Moravian Architecture and Town Planning* William J.
