Stanley Cobb A Builder Of The Modern Neurosciences:

Stanley Cobb Benjamin Vroom White,1984 **Stanley Cobb, a Builder of the Modern Neurosciences** Benjamin Vroom White,Richard J. Wolfe,Eugene Taylor,1984 **Stanley Cobb** Benjamin V. White,1984 Cobb Stanley Stress, Shock, and Adaptation in the Twentieth Century David Cantor,Edmund Ramsden,2014 This edited volume brings together leading scholars to explore the emergence of the stress concept and its ever changing definitions since the 1940s Stress is one of the most widely utilized medical concepts in modern society Originally used to describe physiological responses to trauma it is now applied in a variety of other fields and contexts such as in the construction and expression of personal identity social relations building and engineering and the various complexities of the competitive capitalist economy In addition scientists and medical experts use the concept to explore the relationship between an ever increasing number of environmental stressors and the evolution of an expanding range of mental and chronic organic diseases such as hypertension gastric ulcers arthritis allergies and cancer This edited volume brings together leading scholars to explore the emergence and development of the stress concept and its definitions as they have changed over time It examines how stress and closely related concepts have been used to connect disciplines such as architecture ecology physiology psychiatry psychology public health urban planning and a range of social sciences its application in different settings such as the battlefield workplace clinic hospital and home and the advancement of techniques of stress management in a number of different national sociocultural and scientific locations Contributors Theodore M Brown David Cantor Otniel E Dror Rhodri Hayward Mark Jackson Robert G W Kirk Junko Kitanaka Tulley Long Joseph Melling Edmund Ramsden Elizabeth Siegel Watkins Allan Young David Cantor is acting director Office of History National Institutes of Health Edmund Ramsden is Wellcome Trust University Award Research Fellow at the School of History Queen Mary University of London *The neurologists* Stephen Casper,2016-05-16 The neurologists describes how Victorian physicians located in a medical culture that privileged general knowledge over narrow specialism came to be transformed into the specialised physicians we now call neurologists Relying entirely upon hitherto unseen primary sources drawn from archives across Britain Europe and North America this book analyses the emergence of neurology in the context of the development of modern medicine in Britain The neurologists thus surveys the patterns of change and modernisation that influenced British medical culture throughout the nineteenth and twentieth centuries In so doing it ultimately seeks an account of how neurological knowledge acquired such an expansive view of human nature as to become concerned in the last decades of the twentieth century with the human sciences philosophy art and literature **History of Psychiatry and Medical Psychology** Edwin R. Wallace,John Gach,2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s

D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease **Insights from a Sixty-Four-Year Case of Anorexia Nervosa** Don R.

Lipsitt,2023-04-21 This volume offers rare insight into an enduring case of anorexia nervosa in a female patient and details the approaches to treatment taken by psychotherapists throughout the 64 year period 1938 2002 Through discussion and analysis of clinical notes and transcripts Lipsitt traces the course of the patient s illness to consider the centrality of the mother daughter relationship and to highlight aspects of constancy and change in the illness over time Particular attention is paid to shifts and progress in understanding and treatment of anorexia nervosa and consideration is also given to how contemporary treatment might differ in view of more recent advances in cognitive behavioral approaches Offering an innovative approach toward addressing the transgenerational perspective of women s experiences of eating disorders this book provides material for a range of professionals to discuss the nature of the disorder and the pros and cons of different treatment approaches An original take on the relationship dynamics and perspectives of anorexia sufferers this volume will be of interest to students faculty and scholars with an interest in studying eating disorders and their treatment approaches including psychoanalytic psychotherapy *The Challenge of Community Mental Health and Erich Lindemann* David G.

Satin,2020-09-03 These volumes make new contributions to the history of psychiatry and society in three ways First they propose a theory of values and ideology influencing the evolution of psychiatry and society in recurring cycles and survey the history of psychiatry in recent centuries in light of this theory Second they review the waxing prominence and waning of Community Mental Health as an example of a segment of this cyclical history of psychiatry Third they provide the first biography of Erich Lindemann one of the founders of social and community psychiatry and explore the interaction of the prominent contributor with the historical environment and the influence this has on both We return to the issue of values and ideologies as influences on psychiatry whether or not it is accepted as professionally proper This is intended to stimulate self reflection and the acceptance of the values sources of ideology their effect on professional practice and the effect of values based ideology on the community in which psychiatry practices The books will be of interest to psychiatric teachers and

practitioners health planners and socially responsible citizens National Library of Medicine Current Catalog National Library of Medicine (U.S.),1965 John W. Thompson Paul Weindling,2010 John W Thompson Psychiatrist in the Shadow of the Holocaust is the biography of a doctor whose revulsion at Nazi human experiments prompted him to seek a humane basis for physician patient relations As a military scientific intelligence officer in 1945 Thompson was the first to name medical war crimes as a category for prosecution His investigations laid the groundwork for the Nuremberg medical trials and for the novel idea of informed consent Yet Thompson has remained a little known figure despite his many scientific literary and religious connections This book traces Thompson s life from his birth in Mexico through his studies at Stanford Edinburgh and Harvard and his service in the Canadian Air Force It reconstructs his therapeutic work with Unesco in Germany and his time as a Civil Rights activist in New York where he developed his concept of holistic medicine Thompson was close to authors like Auden and Spender and inspirational religious figures like Jean Vanier founder of L Arche He drew on ideas of Freud Jung and Buber The philosophical and religious dimensions of Thompson s response to Holocaust victims suffering are key to this study which cites accounts of psychiatrists students and patients who knew Thompson personally war crimes prosecution records and unpublished personal papers Paul Weindling is Wellcome Trust Research Professor at the Centre for Health Medicine and Society Past and Present Oxford Brookes University UK
