Our Milky Way

Our Milky Way is a spiral galaxy with a central bulge and a disk. It is composed of billions of stars, gas, and dust.

The central bulge is the densest part of the galaxy, containing the majority of its stars. The disk is the flat, rotating part of the galaxy, which contains the spiral arms.

The spiral arms are regions of high density, where new stars are often born. They are composed of gas and dust, which are compressed together by gravity.

The Milky Way is part of a larger group of galaxies called the Local Group. This group includes the Andromeda Galaxy, the Triangulum Galaxy, and several smaller dwarf galaxies.

The Local Group is part of an even larger structure called the Virgo Supercluster. This supercluster contains thousands of galaxy groups and clusters, including the Virgo Cluster and the Coma Cluster.
