

Stars, Galaxies

Our Milky Way

Our Milky Way is a spiral galaxy with a central bulge and a disk. It is composed of billions of stars, planets, and other celestial objects.

The central bulge is the densest part of the galaxy, containing the majority of its stars. The disk is the flat, rotating part of the galaxy, which contains the spiral arms.

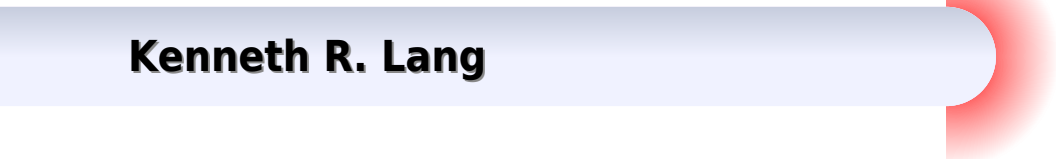

The spiral arms are regions of high density, where new stars are often born. They are composed of gas, dust, and stars.

The Milky Way is part of a larger group of galaxies called the Local Group. It is surrounded by other galaxies, including the Andromeda Galaxy and the Triangulum Galaxy.

The Milky Way is a vast and complex system, and it is still a subject of active research. Scientists are working to understand its structure, evolution, and the role it plays in the universe.
