Starting And Managing Needle And Syringe Programs:

Syringe Exchange Programs and the Opioid Epidemic Joaquin Jay Gonzalez III, Mickey P. McGee, 2022-01-28 Syringe exchange programs and safe injection services are outside the box interventions increasingly being used by governments nonprofits and citizens to address dire issues percolating in tandem with America s burgeoning opioid epidemic People who inject drugs PWID almost a million Americans annually commonly use painkillers such as heroin and fentanyl as well as methamphetamine benzodiazepines barbiturates and cocaine Yet the users themselves are often obscured or marginalized by the bigger picture This collection of essays covers policies and practices aimed at preventing both opioid related deaths and related infections of hepatitis and HIV *First, Do Less Harm* Vanessa Gruben, Chelsea Cox, 2025-02-25 Readers will be able to gain a deeper understanding of how different approaches to harm reduction can create a stronger foundation for more effective policies and legislation Scholars from law and social sciences collaborate with frontline organizations as well as with individuals with lived experience to reflect diverse perspectives and transform how society addresses substance related challenges Each chapter provides unique findings drawing from examples of harm reduction strategies implemented for opioids cannabis and tobacco in Canada and beyond While harm reduction has been a central aspect of the legal and policy responses to all three substances its application has varied significantly First Do Less Harm explores how the ongoing opioid crisis emphasizes the pressing need for safe consumption sites and life saving tools like naloxone Case studies on Canada s legalization of cannabis highlight both the benefits and challenges of providing legal and regulated access to a drug The volume further examines the evolving landscape of tobacco regulations where recent innovations such as vaping offer less harmful alternatives yet raise significant concerns about youth uptake and public health Designed for policymakers health professionals academics and anyone interested in creating safer communities this collection not only presents thought provoking ideas but also provides inspiration to take action *Starting and Managing Needle and Syringe Programs* David Burrows, 2000 *Human Rights and Drug Control* Saul Takahashi, 2016-08-11 It has become almost accepted knowledge within international policy circles that efforts against drug trafficking and drug abuse violate human rights and that the entire international drug control regime needs to be changed or even discarded altogether to adopt a more rights respecting approach Though this view has been promoted by many prominent figures and organisations the author of this book uses his expertise in both human rights and drug control to show that the arguments advanced in this area do not stand close scrutiny The arguments are in fact based on selective and questionable interpretations of international human rights standards and on a general notion more and more clearly stated that there is a human right to take drugs and that any effort to combat drug abuse by definition violates this right There is no such right in international law and the author objects to the misuse of human rights language as a marketing tool to bring about a back door legalisation of drugs Human rights issues must be addressed but that in no way means that the international drug control regime must be discarded or that efforts against

drugs must be stopped

What Do Needle and Syringe Programs Do? Ken Yates, 2023-11-20 This book explores the lived experiences of people who interact with needle and syringe program services in Western Sydney Australia including participants and industry workers It locates the research within the wider context of harm reduction and drug policies It addresses the question what do needle and syringe programs do and seeks to unpack the agency of human and non human factors to consider the more than human effects of these programmes Alongside a critical materialist perspective used to interpret the empirical findings the book demonstrates that needle and syringe programs create new possibilities for engaging with the world by changing the material conditions of illicit drug consumption It draws on the conceptual contributions of post humanist thinking from assemblage theory actor network theory and cognate scholarship Consideration is given to transferable findings and insights for international contexts The book speaks to scholars and postgraduate students in the areas such as sociology criminology social work critical public health cultural studies and related fields

Drug Use in Prisoners Dr. Stuart A. Kinner, Dr. Josiah D. Jody Rich, 2018-01-09 In most countries problematic drug use is dealt with primarily as a criminal justice issue rather than a health issue Accordingly a large proportion of people in prison have a history of alcohol tobacco and or illicit drug use and despite the best efforts of correctional authorities some continue to use these substances in prison often in very risky ways After release from prison many relapse to risky substance use and are at high risk of poor health outcomes preventable death or reincarceration In this edited volume for the first time we bring together 40 contributors from 10 countries to review what

is known about alcohol tobacco and illicit drug use in people who cycle through prisons and the harms associated with use of these substances We consider some evidence based responses to these harms both in prison and after return to the community and discuss their implications for policy reform This book is international in scope and multi disciplinary in character It brings together and integrates the perspectives of public health and addictions researchers criminologists and correctional leaders epidemiologists physicians and human rights lawyers Our contributors are unified in their commitment to evidence informed policy that is doing what we know works An overarching theme pervading all of the chapters is that people who cycle through prisons come from the community and almost always return to the community Their health problems are therefore our health problems in other words prisoner health is public health
