Teaching As Enhancing Human Effectiveness:

Teaching as Enhancing Human Effectiveness Erskine S. Dottin, Lynne D. Miller, 1994 This work highlights the idea that teaching and learning is not a matter of possessing skills nor of being possessed by skills Instead human effectiveness including teaching effectiveness is the potent use of the individual s own self in which one combines one s own knowledge and sensitivity with one s own unique ways of putting it into operation so as to be helpful to others The authors show that learning and teaching others to be human is a new way of being oneself Contents Preface THE QUEST FOR HUMAN DEVELOPMENT Six Evaluative Criteria Erskine S Dottin BEING A SUBJECT AND NOT AN OBJECT Labeling A Frame of Reference for Constructing Meaning Glorianne M Leck Teaching and Avoiding Labels and Categories Michael Walden ACQUIRING PERSONAL MEANING OF LIFE Inside Out Learning Maria Elena Arguilles Self Directed Learning The Intrinsic Quest Lynne D Miller BEING WHAT ONE WANTS TO BE Teacher as Decision Maker Sharon Kossack The Self Directed Professional Mohammed Farouk PARTICIPATING FULLY IN DECISIONS THAT AFFECT ONE S LIFE The Relationship Between Freedom and Responsibility Michael Walden SHARING WITH OTHERS Teaching as Sharing of Self Rosa Pascual Cooperative Learning Maria Alvarez Tsalikis CARING FOR OTHERS Teaching as Caring Joyce C Fine Teaching Learning as Human Community Nina Zaragoza Contributors

Bringing Out the Best in Human Effectiveness Erskine S. Dottin, Daris L. Steen, Denise Samuel, 2004 Bringing Out the Best in Human Effectiveness will greatly interest anyone aspiring to improve the human condition This book focuses on an Upward Bound program conducted at the University of West Florida between 1979 and 1983 This is the long untold story of participant observers and the lessons they learned about the kind of teaching and learning that changes lives

Sharts M.Ed,2015-03-12 In this day and age with the advent and rise of teaching secondary and post secondary courses via online instruction classroom teaching has almost been forgotten as a primary and relevant means for instructing students at the secondary and post secondary level Today more than ever effective classroom instruction is a requisite delivery process for communicating information in a manner that inspires students to attend class and listen attentively once they are present in class This book explores six social interpersonal and dramatic communication teacher behaviors student respect empathy praise encouragement humor use use of personal narratives storytelling and enthusiasm that are an integral part of the

definition of teacher effectiveness because they are correlated with motivating secondary and post secondary students classroom attendance and attentive listening in a classroom environment Moreover this book explores how these six teacher behaviors should be utilized as significant criteria when recruiting and training prospective secondary and post secondary classroom teachers In summation the need for classroom teachers still holds an inspiring and relevant place in civil societies Likewise this book underscores how educators can use knowledge regarding effective classroom teaching to comprehend that skillful classroom instruction is both a science behaviors that are learnable and an art behaviors based more upon natural oral communication gifts yet all such behaviors should guide our recruitment and development of upcoming and currently employed classroom secondary and post secondary teachers Unauthorized Methods Shirley Steinberg, Joe L. Kincheloe, 2012-11-12 This work makes accessible and practicable some of the best theoretical innovation in critical pedagogy of the last decade Issues of knowledge are explored as the authors consider how an integration of popular culture and cultural studies into the lesson plan can enrich and re invigorate the learning experience These essays ranging widely in topic and educational level are based in theory but are practice oriented In translating this theory the contributors provide educators with techniques which will inform rather than oppress classroom skills **Teaching Business Ethics for Effective Learning** Ronald R. Sims, 2002-05-30 The key to teaching business ethics successfully says Sims is to start with clear goals and a sensible expectation of outcomes and with a true knowledge and appreciation of how people actually learn Seems obvious enough he says but the surprise is that so few understand this Thus the teaching of business ethics is often an unproductive frustrating exercise in futility Sims hopes to change that Proceeding with the conviction that open communications between teacher and student before during and after the teaching experience is vital Sims identifies key teaching processes gives practical advice on designing and planning the curriculum and offers guidance on how to develop a climate conducive to effective learning He highlights the importance of creating a classroom climate that encourages open dialogue good moral conversation and conversational learning And throughout he emphasizes that learning styles and experiential learning theory are cornerstones of teaching business ethics thus taking an approach unlike any in the literature An important guide for those who are new to teaching this essential subject Sims book will also be helpful for more experienced teachers who are wondering why their own methods do not always work or do not work as well as they believe they should Sims identifies important processes that must be managed if business ethics is to be taught and learned successfully processes such as creating stakeholder commitment to the goals purposes and outcomes of the teaching effort and curriculum design and planning that are attuned to individual differences in learning styles motivation and values Also included in Sims processes are the development of individual school outcomes and expectations and the assessment procedures that can measure them He discusses the importance of incorporating debriefing into an experiential learning exercise or discussion and goes on to give an in depth discussion of the pedagogical approaches that allow teachers to teach

the practical and theoretical components of the subject simultaneously Well illustrated with examples such as an interdisciplinary approach to teaching and a way to institutionalize outcomes assessment by means of total quality management Sims book returns constantly to his major theme that to teach business ethics effectively the teacher must first create a climate of trust and sharing within and between students and between students and teacher and that the teacher must have a concrete way to measure the impact of the teaching effort s results **Teach Them All to Think** Dr. Muriel Gerhard, 2017-03-24 It just happened There they were Shouting Put it in a book The research is significant The magazine Grade Teacher devoted the whole issue to the research What is significant is that we can teach for thinking We can improve our pupil s cognitive skills be they decision making creativity analysis problem solving inductive and deductive reasoning as well as concept development to mention just a few It all began when I had given a presentation at the ASCD convention addressing over 500 educators following a nine year study on inquiry and cognitive centered teaching funded by The Ford Foundation and now found myself mobbed by publishers to PUT IT IN A BOOK The book was written in ten weeks and it sold and sold and sold one hundred thousand copies and was translated into many foreign languages This resulted in teaching pupils at all grade levels to process information to develop conceptual frameworks and in depth understanding of the content in all disciplines be it mathematics the sciences the social science music and the arts Learners developed and grew concepts and conceptual frameworks and really understood the material as opposed to mouthing memorized sequences of words Let me show you what I am trying to convey I visited a first grade class and there they were singing praises to TWO chanting One and One is TWO Then it happened One little boy raised his hand and blurted out What s a two We live in a conceptual world Whether we are teaching kindergarten children their ABCs or graduate students advanced mathematics we must teach so that they truly understand what they are talking about so that they can develop concepts simple concepts first and then more intricate concepts That my friends is what learning is all about My career has spanned over sixty years spent examining researching developing writing and teaching various methods teachers can use to educate our children more effectively So here it is an updated version of the original book designed for the digital age and our digital destiny providing our new generation with the critical cognitive skills to deal with a very challenging future The processes and strategies are clearly delineated and applicable to every discipline at every level of instruction These have been researched and evaluated In sum the world has become far more complex than any of us as educators could have envisioned We are being deluged with the new the unknown We will need thinkers and problem solvers Teach them all to think Need I say more
