Wideen, Peter P. Grimmett, 2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes Evaluation without Tears Selma Wassermann, 2020-01-15 Teachers evaluate students work constantly It is a built in part of the job of teaching Yet what is hardly acknowledged is the subjectivity and unfairness of evaluation Although grades and marks have long been discounted as having any reliability or validity they endure as real and exact measures of ability and performance Not only are they specious they have little or nothing to do with the important goal of evaluation that is to provide feedback to learners that enables their subsequent growth Evaluation Without Tears

provides teachers with specific examples of how they might provide evaluative feedback to students that is enabling and affirming rather than punishing respectful of the learner and protective of the learner's dignity recognizing that one person's judgment is not truth Teaching students to self assess an important dimension of growth and maturity is a significant feature of the book
