Teaching Learning And Loving Reclaiming Passion In Educational Practice:

Teaching, Learning, and Loving Daniel Patrick Liston, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **The Guided Reader to Teaching and Learning** Denis Hayes, 2010-10-04 The Guided Reader to Teaching and Learning draws on extracts from the published work of some of the most influential education writers in recent times to provide insight guidance and clarity about key issues affecting practitioners at all levels *The Oxford Handbook of Music Education, Volume 2* Gary McPherson, Graham Welch, 2012-07-15 Music education takes place in many contexts both formal and informal Be it in a school or music studio while making music with friends or family or even while travelling in a car walking through a shopping mall or watching television our myriad sonic experiences accumulate from the earliest months of life to foster our facility for making sense of the sound worlds in which we live The Oxford Handbook of Music Education offers a comprehensive overview of the many facets of musical experience behavior and development in relation to this diverse variety of contexts While the first volume primarily focuses on children during school age years this second collects an international list of contributors to explore how music learning takes place outside of the traditional classroom environment Discussing a range of issues such as music education for the special needs population music learning in adulthood and music learning through media and technology these chapters help to broaden conceptions of music and musical involvement Whether they are used individually or in tandem the two volumes of The Oxford Handbook of Music Education update and redefine the discipline and show how individuals across the world learn enjoy and share the power and uniqueness of music *Special Needs, Community Music, and Adult Learning* Gary McPherson, Graham F. Welch, 2018 Designed for music teachers students and scholars of music education as well as educational administrators and policy makers this fourth book in the set focuses on issues and topics that help to broaden conceptions of music and musical involvement while recognising that development occurs through many forms But Don't Call Me White Silvia Cristina Bettez, 2012-01-01 Highlighting the words and experiences of 16 mixed race women who have one white parent and one parent who is a person of color Silvia Bettez exposes hidden nuances of privilege and oppression related to multiple positionalities associated with race class gender and sexuality These women are secret agent insiders to cultural Whiteness who provide unique insights and perspectives that emerge through their mixed race lenses Much of what the participants share is never revealed in mixed White of color company Although critical of racial power politics and hierarchies these women were invested in cross cultural connections and revealed key insights that can aid all in understanding how to better communicate across lines of cultural difference This book is an invaluable resource for a wide range of activists scholars and general readers including sociologists sociologists of education feminists anti oppression social justice scholars critical multicultural educators and qualitative researchers who are interested in mixed race issues cross cultural communication social justice work or who simply wish to minimize racial conflict and other forms of oppression Theoretically grounded and

with vivid detail this book amplifies the voices of mixed race women to trouble and expand our understandings of race gender hybridity and education Silvia Bettez fills a stark gap in the research literature and sets the bar high for what comes next Kevin Kumashiro editor of Troubling Intersections of Race and Sexuality Queer Students of Color and Anti Oppressive Education In But Don t Call Me White Silvia Bettez accomplishes the difficult task of presenting complex theories in accessible ways while introducing the reader to the intersectional nature of identities in the 21st century Through the voices of her participants Bettez illuminates aspects of gender race sexuality and social class that cannot be discerned when examined in isolation and she does so in an engaging manner In addition to presenting a model of excellent qualitative research the book makes a valuable contribution to mixed race studies gender studies and education Kristen A Renn Associate Professor at Michigan State University Silvia Bettez has given us a window into lives that are marked by borders of our own racist creations Yet these women soar and inspire They are insightful and beautiful They teach us the limits of racism and the power of a future where race is mezcla not marker George W Noblit Joseph R Neikirk Distinguished Professor of Sociology of Education University of North Carolina at Chapel Hill Silvia Cristina Bettez teaches about issues of social justice and is an Assistant Professor of Cultural Foundations in the School of Education at the University of North Carolina at Greensboro

Discerning Critical Hope in Educational Practices Vivienne Bozalek, Brenda Leibowitz, Ronelle Carolissen, Megan Boler, 2013-12-04 How can discerning critical hope enable us to develop innovative forms of teaching learning and social practices that begin to address issues of marginalization privilege and access across different contexts At this millennial point in history questions of cynicism despair and hope arise at every turn especially within areas of research into social justice and the struggle for transformation in education While a sense of fatalism and despair is easily recognizable establishing compelling bases for hope is more difficult This book addresses the absence of sustained analyses of hope that simultaneously recognize the hard edges of why we despair The volume posits the notion of critical hope not only as conceptual and theoretical but also as an action oriented response to despair Our notion of critical hope is used in two ways it is used firstly as a unitary concept which cannot be disaggregated into either hopefulness or criticality and secondly as an analytical concept where critical hope is engaged and diversely theorized in ways that recognize aspects of individual and collective directions of critical hope The book is divided into four sub sections Critical Hope in Education Critical Hope and a Critique of Neoliberalism Critical Race Theory Postcolonial Perspectives on Critical Hope Philosophical Overviews of Critical Hope Education can be a purveyor of critical hope but it also requires critical hope so that it as a sector itself can be transformative With contributions from international experts in the field the book will be of value to all academics and practitioners working in the field of education

Peace Education in a Conflict-Affected Society Michalinos Zembylas, Constadina Charalambous, Panayiota

Charalambous,2016-04-21 Peace education initiatives have been subject to heated public debate and so far the complexities involved have not been fully understood This multilayered analysis examines how teachers negotiate ideological pedagogical and emotional challenges in their attempts to enact a peace education policy Focusing primarily on the case study of conflict affected Cyprus Michalinos Zembylas Constadina Charalambous and Panayiota Charalambous situate the Cypriot case within wider theoretical and methodological debates in the field and explore the implications of their findings for theory and practice Building on current anthropological approaches the authors use insights from policy studies and sociolinguistics to examine peace education agendas and the ways these are shaped by the dynamics of local politics and classroom practices This study will be valuable reading for researchers of peace and policy studies as well as for practitioners and policy makers involved in introducing peace education initiatives that challenge teachers long held beliefs *Managing for Social Justice*

Latha Poonamallee,Anita D. Howard,Simy Joy,2023-01-30 The book introduces a preliminary integrative conceptual framework on the intersections between management and social justice with a view that the quest for social justice is not an endpoint rather an ongoing journey With contributions from management scholars and practitioners it highlights examines and explores the continuities and discontinuities gains and losses and struggles and successes in this quest for reimagining organizations as sites and vehicles for advancing social justice in the world To nurture and facilitate flourishing individuals and collectives we need bolder more innovative and more creative models of engagement Further we need models for speaking and learning from different perspectives and building common ground through shared values of equity connectivity and compassion and moral expansiveness while recognizing the complexities of the world we inhabit via our organizations and the need to develop nuanced understandings of the same Contributing authors address questions such as Are social justice and management mutually exclusive concepts How can we draw on effective management for advancing social justice aims How do we bend the arc of organizational life towards more justice What are the rights and obligations of organizations and their members to the world at large and to their local communities and societies Through its re imagining of organizations and management as vehicles for social justice instead of just as tools of oppression injustice or regressive organizing in an extractive economy this book brings together critical and positive organizational approaches challenging fundamental assumptions about how our society people s collectives and workplaces are organized with capacity building incremental change sustained change institutionalized change dynamic ongoing problem solving assessment redesign and more Management scholars will learn the nuanced and complex intersections between management theories and practice and different types of justice injustice in a global context both as antecedents to modern organizations and workplaces and the ways in which these intersectional actors advance and change the organizations and workplaces of the future

Beyond Cartesian Dualism Steve Alsop,2006-02-15 There is surprisingly little known about affect in science education Despite periodic forays into monitoring students attitudes toward science the effect of affect is too often overlooked Beyond

Cartesian Dualism gathers together contemporary theorizing in this axiomatic area. In fourteen chapters, senior scholars of international standing use their knowledge of the literature and empirical data to model the relationship between cognition and affect in science education. Their revealing discussions are grounded in a broad range of educational contexts including school classrooms, universities, science centres, travelling exhibits, and refugee camps, and explore an array of far-reaching questions: What is known about science teachers and students' emotions? How do emotions mediate and moderate instruction? How might science education promote psychological resilience? How might educators engage affect as a way of challenging existing inequalities and practices? This book will be an invaluable resource for anybody interested in science education research and more generally in research on teaching, learning, and affect. It offers educators and researchers a challenge to recognize the mutually constitutive nature of cognition and affect.
