Christian Wolff Ranging from the early Royal Society of London in the seventeenth century to the uptake of experimental philosophy in Paris and Berlin in the eighteenth this book provides new terms of reference for understanding early modern philosophy and science and its eventual eclipse in the shadow of post Kantian notions of empiricism and rationalism

Experimental Philosophy and the Origins of Empiricism is an integrated history of early modern experimental philosophy which challenges the rationalism and empiricism historiography that has dominated Anglophone history of philosophy for more than a century *The Routledge Companion to Philosophy of Science* Stathis Psillos,Martin Curd,2008-01-31 This indispensable reference source and guide to the major themes debates problems and topics in philosophy of science contains fifty five specially commissioned entries by a leading team of international contributors Organized into four parts it covers historical and philosophical contextdebatesconceptsthe individual sciences The Companion covers everything students of philosophy of science need to know from empiricism explanation and experiment to causation observation prediction and more and contains many helpful feat **Universal and Particular—Ideological Developments in the Contemporary Chinese Confucian Revival Movement (2000-2020)** Wei Shi,2023-11-27 Wei Shi s well crafted study weaves together historical context ideological complexities and insightful case studies on Confucian metaphysics ethics and politics Engagingly written it seamlessly bridges the gap between universal and nationalist particular perspectives offering a rich tapestry of ideas and satisfying unity Shi describes the profound impact of Confucian revival on China s cultural identity She argues that Confucian ideas continue to shape China s trajectory in an ever changing world Specialists graduate students and enthusiasts will find this work an invaluable resource in understanding the multifaceted landscape of China s Confucian revival in the twenty first century **Before Method and Models** Ryan Walter,2021 The debate over theory before Malthus and Ricardo Burke Mackintosh and Stewart The vocabulary of theory and practice in the Bullion controversy 1797 The corn laws and free trade casuistry 1813 Doctrinal contest I value Doctrinal contest II rent Doctrinal contest III profits Conclusion A new past **Renaissance and Rebirth** Brian Ogren,2009 Metempsychosis was a prominent element in Renaissance conceptualizations of the human being the universe and the place of the human person in the universe A variety of concepts emerged in debates about metempsychosis human to human reincarnation human to vegetal human to animal and human to angelic transmigration As a complex and changing doctrine metempsychosis gives us a well placed window for viewing the complex and dynamic contours of Jewish thought in late fifteenth century Italy as such it enables us to evaluate Jewish thought in relation to non Jewish Italian developments This book addresses the problematic question of the roles and achievements of Jews who lived in Italy in the development of Renaissance culture in its Jewish and its Christian dimensions **Cartesian Empiricisms** Mihnea Dobre,Tammy Nyden,2013-11-29 Cartesian Empiricisms considers the role Cartesians played in the acceptance of experiment in natural philosophy during the seventeenth century It aims to correct a partial image of Cartesian philosophers as paradigmatic system builders who failed to meet challenges posed by the new science s

innovative methods Studies in this volume argue that far from being strangers to experiment many Cartesians used and integrated it into their natural philosophies Chapter 1 reviews the historiographies of early modern philosophy science and Cartesianism and their recent critiques The first part of the volume explores various Cartesian contexts of experiment the impact of French condemnations of Cartesian philosophy in the second half of the seventeenth century the relation between Cartesian natural philosophy and the Parisian academies of the 1660s the complex interplay between Cartesianism and Newtonianism in the Dutch Republic the Cartesian influence on medical teaching at the University of Duisburg and the challenges chemistry posed to the Cartesian theory of matter The second part of the volume examines the work of particular Cartesians such as Henricus Regius Robert Desgabets Jacques Rohault Burchard de Volder Antoine Le Grand and Balthasar Bekker Together these studies counter scientific revolution narratives that take rationalism and empiricism to be two mutually exclusive epistemological and methodological paradigms The volume is thus a helpful instrument for anyone interested both in the histories of early modern philosophy and science as well as for scholars interested in new evaluations of the historiographical tools that framed our traditional narratives
