Teaching Values in College Richard L. Morrill,1980 *The Larger Learning* Marjorie Carpenter,1960 **Changing Values in College** Philip E. Jacob,1957 **Moral and Political Values in Teacher Education over Time** Nick Mead,2022-08-19 This collection brings together international teacher educators to employ a long view of an historic and values based dialectic in teacher education The authors reflect how employing historical consciousness to look back can offer greater continuity to teachers moral and political values within their training The book draws on research from experienced teacher educators representing different historical social and political contexts in North America Europe Asia as well in post conflict South Africa Within each section the authors reflect on the development of the moral and political values of pre service and in service teachers in an era of global neo liberalism and how this is inextricably bound up with the narratives of professionals in the past within their own national context Each chapter takes a long view of the role of historical consciousness in informing the moral and political values of pre service and in service teachers providing examples of how international teacher educators can collectively support one another in restoring a vibrant values based dialectic within the processes pedagogies and provision of university and school based training for which they are responsible The long view approach offers a compelling argument for the need to connect pre service and in service teachers values and narrative to the legacy of professionals of the past Moral and Political Values in Teacher Education over Time will be of great interest to researchers academics and students in teacher education comparative education and the history of education It will also be of interest to international university and school based teacher educators and policymakers in the field Teaching Values Ron Scapp,2021-04-29 In Teaching Values Ron Scapp wrests the discussion of values and values based education away from traditionalists who have long dominated educational debates While challenging the Right s domination of the discussion of values education Scapp examines some issues not typically raised by educators and critics on the Left including the positive role of citizenship and national identity in U S education and culture **A Study of Personality Characteristics and Values of Secondary School Teachers in Relation to their Classroom Performance and Students' Likings** Nasreen Bano,Mehnaz Ansari,Mohammad Yousuf Ganai,2016-04-05 Teachers are called nation builders in every country and in every society The role of teachers is of great importance It is left to the teachers to inculcate personality characteristics right values the values of good citizenship producing law abiding and nation loving citizens India has made considerable progress in school education since independence with reference to overall literacy infrastructure and universal access and enrolment in schools Two major developments in the recent years form the background to the present reform in teacher education the political recognition of Universalization of Elementary Education UEE as a legitimate demand and the state commitment towards UEE in the form of the Right of Children to Free and Compulsory Education Act 2009 The country has to address the need of supplying well qualified and professionally trained teachers in larger numbers in the coming years At the same time

the demand for quality secondary education is steadily increasing It is recommended that the aim should be to reach universal secondary education within a maximum of ten years Given the problems of inadequate quality in most secondary schools due to poor infrastructure and insufficient and poorly equipped teachers the need for addressing the professional education of secondary teachers acquires great importance The education of teachers should be such that teachers should set an example and provide for their pupils the ideal of the citizens who is conformist conservative and cautions As for their moral character righteousness wisdom honesty are among the adjectives which might be ascribed to them Teachers should assist the students in their physical intellectual religious social emotional spiritual development in the well balanced and harmonious manner and imbue them with human values which is why teacher education today is an integral part of any educational system In this study personality traits of teachers will be analyzed in conjunction with their teaching effectiveness in order to reach a better understanding of what makes a good teacher and how to educate him to satisfy the rising demand of the Indian society

Changing Values in College Philip Ernest Jacob,1958 [Values in Higher Education Teaching](#) Tony Harland,Neil Pickering,2010-10-18 Values in Higher Education Teaching explores the way in which teaching research learning and higher education are a values enterprise and that an exploration of values is necessary to work out the full purposes of a higher education to guide practices and help academics understand academic work Values inform thinking and actions and although this is well recognized values are seldom brought to the forefront of inquiries as practices in higher education are developed This book argues that by putting values firmly on the agenda of those who teach work and learn in higher education the academic profession can open up new spaces for value conversations and potentially transform the way in which they practice Values in Higher Education Teaching is key reading for university lecturers those with responsibility for leadership and management of higher education and postgraduates studying for higher degrees in higher education There are few books that directly address the broad and complex question of values in teaching in higher education yet at the same time values are widely recognised as permeating all our practices In this sense an accepted part of academic life remains in the realm of taken for granted rather than being consciously and explicitly explored and practiced The book deals with the idea of values in both a philosophical and practical manner It is based on original research and uses both empirical data and theory to address teaching values in higher education and the current values of the higher education system It explores what academics have valued historically in teaching and also addresses the major reforms of the last 20 years Reforms have essentially changed the nature of western higher education but have made little real difference to the outcomes for student learning and society whereas teaching with values in all subjects has the potential to radically alter student experiences
