Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the th 20 century as the result of shifts in the nature and demands of health care and societal needs Examples include medical and surgical teams serving the military in World War II primary care teams staffing Community Health Centers created by President Johnson s War On Poverty and geriatric care teams established to serve the rapidly growing number of aging citizens Collaborative teamwork surfaced as a rational solution to health care needs but political and economic consensus to support widespread implementation was lacking The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams but such care was viewed as expensive so evaluation of its effectiveness became essential There were major problems in conducting such evaluation however First no clear theory guided the

concept and practice of teamwork Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics communication organizational development and general systems Further few reliable validated instruments existed to evaluate team process function or effectiveness The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions 1975 78 and from the Veterans Affairs Interprofessional Team Training Development Program Encyclopedia of Library and Information Science Allen Kent, Harold Lancour, 1997-09-16 The Biological Literature to An Uncertainty Principle for Information Seeking A Qualitative Approach **Group Communication** Peter Hartley, 1997 Group Communication introduces applications of small group dynamics Hartley shows how an understanding of how groups work and interact can improve the chances of successful team communication and cooperation Group Communication includes critical reviews of group research explanation of the difficulties and practicalities of observing groups analysis of major group processes including conformity and decision making analysis and case studies of the management team student seminar project groups and self help groups practical recommendation for group communication references and suggestions for further reading and research
