Replacement of Renal Function by Dialysis C. Jacobs, C. M.

Kjellstrand, Karl-Martin Koch, 2008-01-22 Completely revised edition of a global resource first published in 1978 and previously revised in 1989 Sixty three contributions are arranged in sections on the pathophysiology of the uremic syndrome principles and biophysics of dialysis technology of dialysis and associated methods quantification and prescription complications pharmacological considerations special clinical situations organ system and metabolic complications and organization and results of chronic dialysis The aim is to give understanding of the complexities of modern dialysis apparatus so that practitioners can make the best use of the technology and so that fledgling nephrologists can avoid the temptation to by pass the theory and the nuances Annotation copyright by Book News Inc Portland OR *Hemodialysis Technology* Claudio Ronco, G. La Greca, 2002-01-01 This publication is a collection of the papers presented at the First International Course on Hemodialysis Technology Vicenza June 2002 It covers a wide range of topics including aspects of vascular access and new forms of monitoring access function Moreover anticoagulation strategies and antimicrobial treatment are debated with special emphasis on temporary catheters and prosthetic devices Membrane composition and structure their methods of sterilization and performance are discussed by experts and manufacturers bringing together in a unique way science theory and manufacturing procedures The same synthesis is achieved with respect to hemodialyzers adsorbent devices dialysis techniques and machines A new issue is the possibility of computer assisted data collection and management This subject is discussed by experts in electronic data management together with managers of large dialysis networks concentrating on matters of quality assurance and continuous quality improvement programs Special attention is given to dialysate and water

purity since this is the starting point for newer dialytic techniques such as online hemodiafiltration Moreover the results obtained from the IDOPPS study are incorporated into the discussion of different practice patterns and anemia management Finally future trends are explored including automatic sensors and biofeedback monitors Covering various aspects of hemodialysis technology this book will be a helpful tool for physicians and nurses both for education and information
