Pisano,1997 When the pharmaceuticals giant Merck reports promising results for a potential blockbuster drug the story makes the evening news Now at a time when new product development has become critical to success in so many industries The Development Factory proves that process innovation not just product innovation can be the key to competitive edge In this multiyear study of pharmaceutical and biotechnology firms Gary Pisano explores the dynamics of superior product and process development in a highly competitive industry that lives and dies by its R D and depends heavily on rapid time to market His work reveals that behind the success of many new product introductions lies the development of novel process technologies that provide lower costs higher quality and increased flexibility Pisano challenges the widely held product process life cycle view of competition which suggests that industries tend to emphasize either product innovation or process innovation He also questions the notion that there is a conflict between pursuit of product innovation and pursuit of lower costs arguing that product development and process development capabilities are complementary Extending the lessons to a wide variety of manufacturing industries The Development Factory will guide companies toward unlocking the potential of process development and understanding the patterns of organizational behavior and managerial actions that help create and implement new capabilities over time Advances in Computer Science, Environment, Ecoinformatics, and Education, Part III Sally Lin,Xiong Huang,2011-08-09 This 5 volume set CCIS 214 CCIS 218 constitutes the refereed proceedings of the International Conference on Computer Science Environment Ecoinformatics and Education CSEE 2011 held in Wuhan China in July 2011 The 525 revised full papers presented in the five volumes were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on information security intelligent information neural networks digital library algorithms automation artificial intelligence bioinformatics computer networks computational system computer vision computer modelling and simulation control databases data mining e learning e commerce e business image processing information systems knowledge management and knowledge discovering multimedia and its application management and information system mobile computing natural computing and computational intelligence open and innovative education pattern recognition parallel and computing robotics wireless network web application other topics connecting with computer
