Small-aperture Radio Direction-finding Herndon H. Jenkins, 1991 Operating principles Performance definition Direction finding error sources System level descriptions Representative operational small aperture Passive geolocation Subsystem considerations Calibration and test of direction finding systems **Radio Direction Finding and Superresolution** P. J. D. Gething, 1991 Enlarged and revised second edition Modern direction finders capable of measuring elevation angles as well as azimuth angles on the components of multi ray wavefields have become powerful tools for research in ionospheric physics and HF radio propagation The complexity of the problem of resolving closely spaced rays requires the combined use of wide aperture antenna arrays multichannel receiving systems and sophisticated digital processing techniques *An Investigation of a Digital Bearing Computer for a Small Aperture Radio Direction Finding System* Hubert Lee Grush, 1965 **Modern HF Signal Detection and Direction Finding** Jay R. Sklar, 2018-09-25 Detailed descriptions of detection direction finding and signal estimation methods using consistent formalisms and notation emphasizing HF antenna array sensing applications Adaptive antenna array technology encompasses many powerful interference suppression approaches that exploit spatial differences among signals reaching a radio receiver system Today worldwide propagation phenomenology occurring in the High Frequency HF radio regime has made such interference common In this book Jay Sklar a longtime researcher at MIT Lincoln Laboratory presents detailed descriptions of detection direction finding and signal estimation methods applicable at HF using consistent formalisms and notation Modern electronic system technology has made many of these techniques affordable and practical the goal of the book is to offer practicing engineers a comprehensive and self contained reference that will encourage more widespread application of these approaches The book is based on the author s thirty years of managing MIT Lincoln Laboratory work on the application of adaptive antenna array technologies to the sensing of HF communication signals After an overview of HF propagation phenomenology communication signal formats and HF receiver architectural approaches Sklar describes the HF propagation environment in more detail introduces important modulation approaches and signaling protocols used at HF discusses HF receiver system architectural features and addresses signal processor architecture and its implementation He then presents the technical foundation for the book the vector model for a signal received at an adaptive array antenna He follows this with discussions of actual signal processing techniques for detection and direction finding including specific direction finding algorithms geolocation techniques and signal estimation

Illinois Technograph , 1959 [Electronic Warfare Receivers and Receiving Systems](#) Richard A. Poisel, 2015-06-01 Receivers systems are considered the core of electronic warfare EW intercept systems Without them the fundamental purpose of such systems is null and void This book considers the major elements that make up receiver systems and the receivers that go in them This resource provides system design engineers with techniques for design and development of EW receivers for modern modulations spread spectrum in addition to receivers for older common modulation formats Each major

module in these receivers is considered in detail Design information is included as well as performance tradeoffs of various components Major factors that influence the functioning of the modules are identified and discussed Key performance parameters are identified as well and approaches to achieving design goals are considered The Art and Science of Ultrawideband Antennas, Second Edition Hans G. Schantz, 2015-06-01 This comprehensive treatment of ultrawideband UWB antennas and time domain microwave engineering serves as an invaluable practical reference for anyone involved in antenna and RF design work This authoritative volume enables readers to select the proper UWB antennas for their applications design and analyze UWB antennas and integrate these antennas in an RF system By applying time domain thinking to problems of practical interest the reader will not only learn how to build and analyze antennas but also understand them at the most fundamental level This second edition is updated and expanded throughout providing readers with a history of antennas numerous new problem sets and worked examples along with new information on plotting time domain field lines time domain reflectometry matching techniques and more This book also addresses system issues like spectral control and antenna efficiency **Antenna Systems and Electronic Warfare Applications** Richard Poisel, 2012 Antennas systems play a critical role in modern electronic warfare communications and radar Today s EW engineers need to have a solid understanding of the design principles of this technology and how antenna systems are used in the field This comprehensive book serves as a one stop resource for practical EW antenna system know how Supported with over 700 illustrations and nearly 1 700 equations this authoritative reference offers professionals detailed explanations of all the important foundations and aspects of this technology Moreover engineers get an in depth treatment of a wide range of antenna system applications The book presents the key characteristics of each type of antenna including dipoles monopoles loops arrays horns and patches Practitioners also find valuable discussions on the limitations of antennas system performance in EW applications Scientific and Technical Aerospace Reports , 1995 **Electronic Warfare Target Location Methods, Second Edition** Richard Poisel, 2012 Worldwide growth of space communications has caused a rapid increase in the number of satellites operating in geostationary orbits causing overcrowded orbits This practical resource is designed to help professionals overcome this problem This timely book provides a solid understanding of the use of radio interferometers for tracking and monitoring satellites in overcrowded environments Practitioners learn the fundamentals of radio interferometer hardware including antennas receiving equipment signal processing and phase detection and measurement accuracies This in depth volume describes the nature of the targets to be tracked by the interferometer helping to clarify the movement of target satellites and what specific information has to be caught by the interferometer Additionally engineers find details on applications to practical cases of satellite tracking covering different types of interferometers recent technical developments orbital monitoring and safety control **Official Gazette of the United States Patent Office** United States. Patent Office, 1964 *Underwater Acoustic Data Processing* Y. T. Chan, 2012-12-06 This book contains the papers that were

accepted for presentation at the 1988 NATO Advanced Study Institute on Underwater Acoustic Data Processing held at the Royal Military College of Canada from 18 to 29 July 1988 Approximately 110 participants from various NATO countries were in attendance during this two week period Their research interests range from underwater acoustics to signal processing and computer science some are renowned scientists and some are recent Ph D graduates The purpose of the ASI was to provide an authoritative summing up of the various research activities related to sonar technology The exposition on each subject began with one or two tutorials prepared by invited lecturers followed by research papers which provided indications of the state of development in that specific area I have broadly classified the papers into three sections under the titles of I Propagation and Noise II Signal Processing and III Post Processing The reader will find in Section I papers on low frequency acoustic sources and effects of the medium on underwater acoustic propagation Problems such as coherence loss due to boundary interaction wavefront distortion and multipath transmission were addressed Besides the medium corrupting noise sources also have a strong influence on the performance of a sonar system and several researchers described methods of modeling these sources
