The Altering Eye Robert Phillip Kolker, 2009

The Altering Eye covers a golden age of international cinema from the end of WWII through to the New German Cinema of the 1970s. Combining historical political and textual analysis, the author develops a pattern of cinematic invention and experimentation from neorealism through the modernist interventions of Jean Luc Godard and Rainer Maria Fassbinder, focusing along the way on such major figures as Luis Buñuel, Joseph Losey, the Brazilian director Glauber Rocha, and the work of major Cuban filmmakers. Kolker's book has become a much quoted classic in the field of film studies, providing essential reading for anybody interested in understanding the history of European and international cinema. This new and revised edition includes a substantive new Preface by the author and an updated Bibliography.

Chronicle of a Camera Norris Pope, 2013-03-06. This volume provides a history of the most consequential 35mm motion picture camera introduced in North America in the quarter century following the Second World War, the Arriflex 35. It traces the North American history of this camera from 1945 through 1972, when the first lightweight self-blinded 35mm cameras became available. Chronicle of a Camera emphasizes theatrical film production, documenting the Arriflex's increasingly important role in expanding the range of production choices, styles, and even content of American motion pictures in this period. The book's exploration culminates most strikingly in examples found in feature films dating from the 1960s and early 1970s, including a number of films associated with what came to be known as the Hollywood New Wave. The author shows that the Arriflex prompted important innovation in three key areas: it greatly facilitated and encouraged location shooting; it gave cinematographers new options for intensifying visual style and content; and it stimulated low-budget and independent production. Films in which the Arriflex played an absolutely central role include Bullitt, The French Connection, and most significantly, Easy Rider. Using an Arriflex for car-mounted shots, hand-held shots, and zoom-lens shots led to greater cinematic realism and personal expression.
