Sorms Werke In Zwei Baenden:

Understanding Ferdinand Tönnies' Community and Society Niall Bond, 2013 This book surveys Ferdinand Tönnies' intellectual biography *Community and Society* and retraces the origins of a founding work of the modern social sciences and a classic of political thought to vital contrasts in Tönnies' early life, philosophers, natural law theorists, the Enlightenment, the Romantic movement, the socialists, of the lecture Marx, Schopenhauer, Nietzsche, and 19th century legal theorists. The book illuminates the at times obscure intent behind Tönnies' sociology, theory of history, and controversial ground-breaking concepts. Forster, Kristin Gjesdal, 2015

The Oxford Handbook of German Philosophy in the Nineteenth Century is the first collective critical study of this important period in intellectual history. The volume is divided into four parts. The first part explores individual philosophers including Fichte, Hegel, Schopenhauer, Marx, and Nietzsche, amongst other great thinkers of the period. The second addresses key philosophical movements: Idealism, Romanticism, Neo-Kantianism, and Existentialism. The essays in the third part engage with different areas of philosophy that received particular attention at this time, including philosophy of nature, philosophy of mind, philosophy of language, philosophy of history, and hermeneutics. Finally, the contributors turn to discuss central philosophical topics, from skepticism to materialism, from dialectics to ideas of historical and cultural Otherness, and from the reception of antiquity to atheism. Written by a team of leading experts, this Handbook will be an essential resource for anyone working in the area and will lead the direction of future research. **Friedrich Schleiermacher's Pathways of Translation** Piotr de Bończa

Bukowski, 2023-01-30 This interdisciplinary study introduces readers to Friedrich Schleiermacher's diverse pathways of reflection and creative practice that are related to the field of translation. By drawing attention to Schleiermacher's various writings on a range of subjects, including philology, criticism, hermeneutics, dialectics, rhetoric, and religion, the author makes it clear that the frequently cited lecture *ber die verschiedenen Methoden des bersetzens* 'On the Different Methods of Translating' represents but a fraction of Schleiermacher's contributions to modern-day insights into translation. The analysis of Schleiermacher's various pathways of reflection on translation presented in this book leads to the conclusion that translation is part of the essence of the world as it is a fundamental tool of our cognition and a foundation of our existence. In Schleiermacher's works, translation, mediation, and communication underpin our very existence in the world and our self-awareness. At the same time, they represent fundamental categories for a project that focuses on the consolidation and assimilation through translation of that which is foreign, different, diverse.
