Stardust Supernovae And Life The Cosmic Connection:

Stardust John Gribbin, Mary Gribbin, 2001-08-01 The Gribbins relate the developments in 20th century astronomy that have led to the shattering realization that all life is made of stardust scattered across the universe in great stellar explosions from supernovae The authors eloquently explain how the physical structure of the universe has produced conditions ideal for life 22 illustrations Dreams of Other Worlds Chris Impey, Holly Henry, 2016-04-19 The story of unmanned space

exploration from Viking to today Dreams of Other Worlds describes the unmanned space missions that have opened new windows on distant worlds Spanning four decades of dramatic advances in astronomy and planetary science this book tells the story of eleven iconic exploratory missions and how they have fundamentally transformed our scientific and cultural perspectives on the universe and our place in it The journey begins with the Viking and Mars Exploration Rover missions to Mars which paint a startling picture of a planet at the cusp of habitability It then moves into the realm of the gas giants with the Voyager probes and Cassini's ongoing exploration of the moons of Saturn The Stardust probe's dramatic round trip encounter with a comet is brought vividly to life as are the SOHO and Hipparcos missions to study the Sun and Milky Way This stunningly illustrated book also explores how our view of the universe has been brought into sharp focus by NASA's great observatories Spitzer Chandra and Hubble and how the WMAP mission has provided rare glimpses of the dawn of creation Dreams of Other Worlds reveals how these unmanned exploratory missions have redefined what it means to be the temporary tenants of a small planet in a vast cosmos The Mysterious Universe Ellen Jackson, 2008 The universe is rapidly expanding Of that much scientists are certain But how fast And with what implications regarding the fate of the universe Ellen Jackson and Nic Bishop follow Dr Alex Filippenko and his High Z Supernova Search Team to Mauna Kea volcano in Hawaii where they will study space phenomena and look for supernovae dying stars that explode with the power of billions of hydrogen bombs Dr Filippenko looks for black holes areas in space with such a strong gravitational pull that no matter or energy can escape from them with his robotic telescope And they study the effects of dark energy the mysterious force that scientists believe is pushing the universe apart causing its constant and accelerating expansion *Cosmos & Culture:*
