

A man in a dark suit and a top hat is seen from the side, looking out of a window. The window has a grid of panes, and the background outside is a hazy, overcast sky. The overall tone is somber and reflective.

Staring Into Chaos Explorations In The Decline Of Western Civilization:

Staring Into Chaos Bruce Brander, 1998 Readers who feel stranded in a painful epoch of cultural decline will learn why it is occurring where it might lead and why the West may yet be reborn as a culture of truth and life *Hope in the Thought of Jacques Ellul* Lawrence J. Terlizese, 2005-10-30 Hope expresses more than an area of concentration in Ellul's thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world's embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction

America Is Self-Destructing Thomas P. Wallace, 2013-06 Countries that at different times in history were among the world's greatest powers such as Sweden the Netherlands France Britain and Germany have gradually shifted their sights either in the wake of defeat or after protracted periods of grappling with decline from winning the great power sweepstakes to topping the lists of nations offering the best quality of life David Rothkopf One critical measure of the health of a modern democracy is its ability to legitimately extract taxes from its own elites The most dysfunctional societies in the developing world are those whose elites succeed either in legally exempting themselves from taxation or in taking advantage of lax enforcement to evade them Francis Fukuyama Today the United States has less equality of opportunity than almost any other advanced industrial country Study after study has exposed the myth that America is a land of opportunity Joseph E Stiglitz Tea Party constitutionalism and conservative originalism more generally are less interested in the Constitution's actual words or the real intentions of the Founders than they are in rolling back democratic advances that have been made since 1787 E J Dionne **Trajectory of the 21st Century** Lawrence J. Terlizese, 2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and

a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book s theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a postrationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century

Revolutions, Nations, Empires Alexander J. Motyl, 1999 In this concise provocative and trenchant book Alexander J Motyl argues that social scientists must pay more rigorous attention to the formulation of concepts as they provide the basis for clear thinking good research and intelligent formulation of theories Focusing his conceptual explorations on three phenomena revolutions nations and nationalism and empires Motyl challenges the sloppy thinking that so often surrounds these three interrelated concepts and moves our understanding of them toward greater precision

Wealth, Energy, and Human Values Thomas P. Wallace, 2009 The degradation of the modern American culture including its 2008 financial and economic crisis and the modern rejuvenation of Asian cultures are best understood within the context of 4 000 years of human history Such are the consequences of the dynamics of cultural change responding to societal variables of wealth energy and human values This work provides a unique and formidable science based framework for civilization development that complements and enhances the work of preeminent historians and sociologists Accordingly the foundation for societal progress is placed on restrictive scientific definitions principles and concepts of energy and wealth consumption rather than solely on behavioral perspectives derived from empirical data and historical events Society s dynamic forces are linked to the cultural deterioration and collapse of Ancient Greece and Rome Imperial Spain and Great Britain Specific chapters are devoted to stagnation of Western civilization Asian and Islamic resurgence deterioration of the American culture and ecological degradation of North America s largest estuary the Chesapeake Bay collateral damage of socio economic profitability The characteristics of America s current cultural deterioration parallel those of previous great civilizations These include abuse of wealth and energy resources excessive individual and national debt lack of cultural civility discipline integrity and ethics unaffordable militarism escalating income and wealth disparities unresolved crises in health care and public education and stultifying cultural complexity and bureaucracy Themes include the underlying principles responsible for the eventual deterioration of all known civilizations the basis for the recurring sequential

periodicity of civilization success and failure and the roles and significance of militarism and religion in civilization growth decay and rebirth Addressing these themes necessitates the integration of the academic disciplines of history sociology economics and science reflecting human nature and socioeconomic and political realities that fundamentally and continuously alter human values priorities and behavior thus creating human history **Holman Old Testament**

Commentary Volume 14 - Ecclesiastes, Song of Songs David Moore, Dr. Daniel L. Akin, 2003-07-01 One in a series of twenty Old Testament verse by verse commentary books edited by Max Anders Includes discussion starters teaching plan and more Great for lay teachers and pastors alike Mother Jones Magazine, 1998-07 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues *The Futurist*, 1999 **Change across Cultures** Bruce Bradshaw, 2002-03-01 C S Lewis compared the task of ethical inquiry to sailing a fleet of ships the primary task is avoiding collisions When introducing cultural change such collisions are inevitable Bruce Bradshaw provides expert instruction for navigating these cultural clashes Bradshaw contends that lasting change comes only through altering the stories by which people live The Bible is the metanarrative whose altering theme of redemption forms a transcultural ethical basis Aspects of God's redemption story can change how local cultures think and behave toward the environment religions government gender identities economics science and technology However effective change takes place only in a context of reconciliation Christian community and mutual learning A must read for anyone engaged in or preparing for cross cultural ministry relief or development work The book is also relevant to students of ethics philosophy and theology Numerous real life examples illustrate the inevitable tensions that occur when cultures and narratives collide
