Starry Night A Speculative Alternate Cosmology:

Starry Night Gavin Immermann, 1993 STARRY NIGHT Modest in size with an ambitious scope While it doesn't answer the ultimate question of life the universe everything it does give you a lot to think about Classified by form as poetry it is a sui generis work part metaphysical treatise part anti reductionist polemic It could be given a place on any number of bookstore shelves Physics Philosophy Religion or even New Age Dedicated to Stephen Hawking it nevertheless questions most of the big bang theory of the origin of the universe STARRY NIGHT also goes powerfully beyond most of the current popular books on this subject in attempting to reconcile the physics of creation with the notion that life consciousness is less accidental more purposeful than some scientists would have you believe An early version read by several theoretical physicists was well received even as they did not agree with some of it Order from the publisher Demiurge Editions 1530 S 6 St C 1907

the enduring quest for understanding in the boundless expanse of the universe *Spectres of Pessimism* Mark Schmitt, 2023-03-15 This book argues that philosophical pessimism can offer vital impulses for contemporary cultural studies Pessimist thought offers ways to interrogate notions of temporality progress and futurity When the horizon of future expectation is increasingly shaped by the prospect of apocalypse and extinction an exploration of pessimist thought can help to make sense of an increasingly complex and uncertain world by affirming rather than suppressing the worst This book argues that a cultural logic of the worst is at work in a substantial section of contemporary philosophical thought and cultural representations Spectres of pessimism can be found in contemporary ecocritical thought antinatalist philosophies political thought and cultural theory as well as in literature film and popular music In its unsettling of temporality this new pessimism shares sensibilities with the field of hauntology Both deconstruct linear narratives of time that adhere to a stable sequence of past present and future Mark Schmitt therefore couples pessimism and hauntology to explore the spectres of pessimism in a range of theories and narratives from ecocriticism antinatalism and queer theory to utopianism from afropessimism to the fiction of Hari Kunzru and Thomas Ligotti to the films of Camille Griffin Gaspar Noé Denis Villeneuve and Lars von Trier

Science Fact and Science Fiction Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed Sci-Fi Box Set: 140+ Dystopian Novels, Novels Space Adventures, Lost World Classics & Apocalyptic Tales Jules Verne, Mark Twain, Robert Louis Stevenson, James Fenimore Cooper, Edgar Allan Poe, William Hope Hodgson, George MacDonald, Percy Greg, Jack London, Arthur Conan Doyle, Ernest Bramah, Jonathan Swift, Cleveland Moffett, William Morris, Anthony Trollope, Richard Jefferies, Samuel Butler, David Lindsay, Edward Everett Hale, Edward Bellamy, Charlotte Perkins Gilman, Edgar Wallace, Francis Bacon, Robert Cromie, Abraham Merritt, Ignatius Donnelly, Owen Gregory, H. Speaking Beyond Earth Paul E. Quast, David Dunér, 2024-04-03 Since the dawn of the Space Age small cohorts of humanity have broadcast signals towards other stars fabricated space time capsules to speak for Earth aboard interstellar probes deposited collections of space oddities on other astronomical bodies and permanently incised the memory of our species across the deep time legacy of the Sol System Many of these purposeful messages are the consequence of age old behaviors traditions and material practices using modern aerospace technologies Most attempt to preserve narratives of human experience in social exchange devices for imagined exotic audiences Looking back upon this accumulative history of messaging from Earth how do we begin to interpret such an eclectic portrait of Earth for ourselves Surveying and cataloguing the variety of these artifacts through a series of interdisciplinary essays and visual documentation this volume chronicles our changing relationships customs and assumptions made within this material culture for our own eyes What do these autobiographical accounts tell us about Terrans and our minds set against the backdrop of
