ving groups It stresses the influence of the culture of postwar social reconstruction in shaping these groups ideas about physical education Through this analysis the book attempts to explain how physical education has been socially constructed during the postwar years and more specifically to suggest how the subject came to be used as a symbol of subversive left wing values in the campaign leading to the 1987 election In more general terms the book provides a case study of the social construction of school knowledge The book takes an original approach to the question of curriculum change in physical education building on increasing interest in historical research in the field of curriculum studies It adopts a social constructionist perspective arguing that change occurs through the active involvement of competing groups in struggles over limited material and ideological discursive resources It also draws on contemporary developments in social and cultural theory particularly the concepts of discourse and ideological hegemony to explain how the meaning of physical education has been constructed and how particular definitions of the subject have become orthodoxes The book presents new historical evidence from a period which had previously been neglected by researchers despite the fact that 1945 marked a watershed in the development of the understanding and teaching of physical education in schools
