Teaching Music Differently Tim Cain, Joanna Cursley, 2017-07-14 Teaching Music Differently explores what music teachers do and why It offers insightful analysis of eight in depth studies of teachers in a range of settings the early years a special school primary and secondary schools a college a prison a conservatoire and a community choir and demonstrates that pedagogy is not simply the delivery of a curriculum or an enactment of a teaching plan Rather a teacher's pedagogy is complex nuanced and influenced by a multitude of factors Exploring the theories teachers hold about their own teaching it reveals that even when teachers are engaged with the same subject their teaching varies substantially It analyses the differences in terms of agency the knowledge and skills that teachers bring to teaching their expectations shaped by their life histories the ways in which they relate to their students and the subject and their ideas about the content they teach what is

important what is interesting what is difficult for students to grasp It also explores the constraints that are imposed upon the teachers by curriculum policy institutions society and the students themselves Together with discussion of key ideas for understanding the case studies historical influences on music pedagogy and the main discourses around music teaching Teaching Music Differently invites all music education professionals to consider their own responses to pedagogical discourses and to use these discourses to further the development of the profession as a whole The Art of Teaching Music Estelle R. Jorgensen, 2008-03-19 Opens a conversation about the life and work of the music teacher The author regards music teaching as interrelated with the rest of lived life and her themes encompass pedagogical skills as well as matters of character disposition value personality and musicality She urges music teachers to think and act artfully *Learning to Teach Music in the Secondary School* Chris Philpott, 2001 Learning to Teach Music in the Secondary School is intended to support student teachers newly qualified teachers and more experienced music teachers in their professional development Topics covered include the place of music in the curriculum the nature of musical learning planning managing and assessing musical learning school examinations and music music outside of the curriculum One of the main premises of the book is that music needs to be taught musically with specific reference to both the nature of music itself and its metaphorical significance It is important that music itself guides what goes on in the music classroom if we are to motivate our pupils and help them to fulfil their potential as musicians This book will help student teachers to develop their subject knowledge teaching skills understanding of the wider issues and their ability to reflect on classroom practice **The New Handbook of Research on Music Teaching and Learning** Richard Colwell, Carol Richardson, 2002-04-18 Featuring chapters by the world's foremost scholars in music education and cognition this handbook is a convenient collection of current research on music teaching and learning This comprehensive work includes sections on arts advocacy music and medicine teacher education and studio instruction among other subjects making it an essential reference for music education programs The original Handbook of Research on Music Teaching and Learning published in 1992 with the sponsorship of the Music Educators National Conference MENC was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field Choice This new companion volume again with the sponsorship of MENC explores the significant changes in music and arts education that have taken place in the last decade Notably several chapters now incorporate insights from other fields to shed light on multi cultural music education gender issues in music education and non musical outcomes of music education Other chapters offer practical information on maintaining musicians health training music teachers and evaluating music education programs Philosophical issues such as musical cognition the philosophy of research theory curriculum and educating musically are also explored in relationship to policy issues In addition to surveying the literature each chapter considers the significance of the research and provides suggestions for future study Covering a broad range of topics and addressing the issues of music education at all age levels from early
