Culture, Transnational Education and Thinking Niranjana Casinader, 2014-04-24 The notion of thinking skills as a key component of a 21st century school education is now firmly entrenched in educational policy and curriculum frameworks in many parts of the world However there has been relatively little questioning of the manner in which educational globalisation has facilitated this diffusion of thinking skills curriculum and pedagogy in a cultural context This book will help to redress such an imbalance in its critical assessment of the cross cultural validity of transplanting thinking skills programs from one educational system to another on an international scale Culture Transnational Education and Thinking provides an international comparative study of the intersection of three educational concepts culture education and thinking Drawing on case studies from Malaysia South Africa and Australia USA for the purposes of comparative analysis the book employs the context of an international school program in the teaching of thinking skills Future Problem Solving Program International The book explores the associations between Future Problem Solving educators their cultural background and their approaches to thinking evaluating the relevance of transferring thinking skills programs derived in one cultural framework into another The book also discusses the wider implications of these cross cultural comparisons to curriculum and pedagogy within schools and higher education with a particular emphasis on the teaching of multicultural school based classes and cross cultural understandings in teacher education and professional development This book will be of relevance to academics and higher education students who have an interest in the fields of cross cultural and intercultural understanding comparative studies in education and theories and practices of cognition as well as the development of tertiary and secondary curricula and associated pedagogies that specifically acknowledge the cultural diversities of both teacher and learner

Power Thinking John Mangieri, Cathy Collins Block, 2015-08-19 Most individuals were never formally taught thinking skills and as a result are using processes that were developed during childhood to reach decisions and solve problems Thus in an era of knowledge explosion organizational performance accountability and rapid change caused by technology leaders and managers are trying to succeed using thinking patterns developed before they were twelve years old Power Thinking offers leaders the information they need to evaluate their current thinking proficiencies determine areas for improvement and enhance their thinking skills The book includes the Yale Assessment of Thinking a standardized assessment measure that enables readers to determine their

abilities in the cognitive domains found to be crucial to being an outstanding leader *The Routledge International Handbook of Research on Teaching Thinking* Rupert Wegerif, Li Li, James C. Kaufman, 2015-05-22 The Routledge International Handbook of Research on Teaching Thinking is a comprehensive guide to research on teaching thinking Teaching thinking is key to growing a more successful economy is needed for increased democratic engagement and is vital for the well being of individuals faced with the complexity of a globalised world However there are questions about what we mean by thinking how best to teach it and how best to assess it and it is these questions that this handbook explores and addresses Containing surveys and summaries of international cutting edge research on every aspect of teaching thinking in a range of contexts the handbook is thorough in its delivery examining many different approaches and methods to help readers understand what teaching thinking is and how we can best take this movement forward Key topics include Theoretical perspectives on teaching thinking Approaches for teaching thinking Developing creative thinking Developing critical thinking and metacognition The assessment of thinking Teaching thinking in the context of STEM Collaborative thinking and new technology Neuro educational research on teaching thinking This book is an essential guide for policy makers teachers and researchers who are interested in teaching thinking **Critical Thinking Across the Curriculum** Diane F. Halpern, 2014-02-04 Consider that many of the people who are alive today will be working at jobs that do not currently exist and that the explosion of information means that today's knowledge will quickly become outdated As a result two goals for education clearly emerge learning how to learn and how to think critically about information that changes at a rapid rate We face a multitude of new challenges to our natural environment difficult dilemmas concerning the use of weapons of mass destruction political agendas for the distribution of scarce commodities and wealth psychological problems of loneliness and depression escalating violence and an expanding elderly population International in scope and in magnitude these new problems strain resources and threaten the continuance of life on earth To creatively and effectively attack these imminent problems a well educated thinking populace is essential An abridged edition of Halpern's best selling text *Critical Thinking Across the Curriculum* is designed to help students enhance their thinking skills in every class The skills discussed are needed in every academic area and setting both in and out of class They are determining cause assessing likelihood and uncertainty comprehending complex text solving novel problems making good decisions evaluating claims and evidence and thinking creatively In this adaptation of her best selling text Diane Halpern applies the theories and research of cognitive psychology to the development of critical thinking and learning skills needed in the increasingly complex world in which we work and live The book is distinguished by its clear writing style humorous tone many practical examples and anecdotes and rigorous academic grounding Everyday examples and exercises promote the transfer of critical thinking skills and dispositions to real world settings and problems The goal is to help readers recognize when and how to apply the thinking skills needed to analyze arguments reason clearly identify and solve problems and make sound decisions Also of importance a

general thinking skills framework ties the chapters together but each is written so that it can stand alone This organization allows for maximum flexibility in the selection of topics and the order in which they are covered This book is intended for use in any course emphasizing critical thinking as an approach to excellence in thinking and learning Exemplary Literacy Teachers, Second Edition Cathy Collins Block, John N. Mangieri, 2009-04-22 Identifying what exemplary teachers know and do to promote literacy achievement at every grade level this highly motivating book provides step by step guidance for professional development It helps teachers assess their strengths and build their competencies in six key domains of literacy instruction directly linked to student success Featuring skills building exercises sample lesson plans book lists and over a dozen reproducibles the book illustrates specific actions that teachers can take to emulate their most effective colleagues in school districts around the country New to This Edition Revised and updated based on the authors professional development work with over 20 000 educators Expanded to cover K 12 prior edition covered K 5 Now includes material for literacy coaches and administrators as well as teachers Teacher in Action cases offer vivid snapshots of exemplary practices Many of the activities and reproducibles are new or revised
