twenty years of research to reveal the common misguided strategies students use in trying to understand a topic and then shows teachers and parents what strategies they can use with children to increase real understanding Developing More Curious Minds John Barell,2003-02-15 After the September 11 attacks on the World Trade Center and Pentagon many people questioned why no one had anticipated the terrorists acts even when events and intelligence seemed to point toward them John Barell wonders if the attacks speak to a greater societal problem of complacency He believes many students have become too passive in their learning accepting information and facts as presented in textbooks classes and the media Drawing on anecdotes from educators and his own life Barell describes practical strategies to spur students ability and willingness to pose and answer their own questions Antarctica expeditions outer space discoveries dinosaur fossils literature and more help define the importance of developing an inquisitive mind using such practices as Maintaining journals on field trips Using questioning frames and models when reading texts Engaging in critical thinking and problem based learning and Integrating inquiry into curriculum development and the classroom culture To become habits of mind students daily curiosities must be nurtured and supported Barell draws a vivid map to guide readers to an intelligent revolution in which schools can become places where educators and students imagine and work together to become active citizens in their society Note This product listing is for the Adobe Acrobat PDF version of the book **Creating a Professional Community Through Means-Ends Connections to Facilitate the Acquisition of Moral Disposition** Erskine S.
