Teaching One Child:

One Child at a Time Pat Johnson, 2023-10-10 Every elementary teacher deals with students who struggle as readers on a daily basis. Each struggling child is complex and each has a unique history as a learner. In *One Child at a Time*, experienced literacy specialist and consultant Pat Johnson provides a framework she has used in numerous K-6 classrooms to help teachers understand and assist individual children. The four-step process outlined in the book enables teachers to focus carefully on specific strategies and behaviors, analyze them with theoretical and practical lenses, design targeted instruction in keeping with current research on reading process, and then assess and refine the teaching in conferences with the child. The framework is by no means an easy answer to a difficult problem, but through its use, teachers learn how the reading process works for proficient readers and how to support struggling readers as they construct their own reading process. The text is packed with examples of actual conferences with students, detailing how and when Pat and her colleagues intervene to instruct and assess. The examples of follow-up assessment and analysis of struggling readers over days and weeks provide an indispensable model for teachers. Pat shows how to use this framework successfully with a range of learners, including young children, English language learners, and students in the upper elementary grades who are stalled in their literacy progress. She builds upon her decades of work as a classroom teacher, literacy specialist, and consultant in schools with high poverty and diversity to demonstrate how this framework can be useful in any setting.

Teaching and Learning to Unlock Social Mobility for Every Child Sonia Blandford, Stefan Burkey, 2023-04-10 *Teaching and Learning to Unlock Social Mobility for Every Child* is a topical and insightful text that guides readers through evidence-based practice that will improve outcomes for all involved in education, increasing social mobility and inclusion in every sense. In the past 30 years, how children and young people learn has changed considerably as challenges of social mobility become more apparent. Cultural and social economic disadvantage is evident, as is the need to focus on mutuality in education whereby all children and young people are valued regardless of their background, challenges, or needs. In this context, *Teaching and Learning to Unlock Social Mobility for Every Child* is the first work to capture and clearly explain practical teaching and learning approaches that can be used in any school. It circles around the creativity and technology of pedagogy, exploring an educational agenda that is genuinely rooted in social mobility for all children. Written accessibly and full of case studies, this book is intended to guide practitioners and stakeholders at all levels of education, from school leaders to researchers, students, and teachers. It will help them to impart the skills and capacities which children and young people require to drive their future social mobility and address the challenges they will face on their own terms.

Teaching Mathematics as to be Meaningful - Foregrounding Play and Children's Perspectives Hanna Palmér, Camilla Björklund, Elin Reikerås, Jessica Elofsson, 2023-10-29 This open access book's theme is *Teaching mathematics as to be meaningful: foregrounding children's play and perspectives*. It discusses the relation between teachers, children, and mathematical content within the context of play, with a particular focus

on the framing of these relations within this context which is an important theme in the debate on whether teaching should be integrated with or separated from children's play. The work further addresses meaningfulness in the learning process particularly from the child's perspective. Globally most guidelines and curricula for early childhood education mention play as one of the key features for young children's learning. Still there are quite different views on the definitions of play and in what ways play should become part of children's learning. The chapters of the book mirror the research topics presented at the fifth POEM conference in May 2022 divided into four sub themes: Play and learning; Children's perspectives on mathematics; Teachers' competencies and Theorizing aspects of early mathematics education. **Methods for Teaching in Early**

Education Jennifer Ledford, Justin Lane, Erin Barton, 2019-03-04. *Methods for Teaching in Early Education* is a comprehensive textbook offering a thorough introduction to early childhood teaching methods with a particular focus on inclusive practices. Aligned with both NAEYC standards and CEC's Division for Early Childhood recommended practices, this text explores various early childhood teaching principles and strategies providing useful guidance for identifying and choosing between approaches. Covering topics from child directed strategies to working with professionals in early childhood, the authors provide extensive support to prepare teachers for classroom planning and instruction. Each chapter opens and closes with representative vignettes of the challenges faced by today's early educators and helpfully highlights key terms and objectives to inform learning goals. With the addition of sample worksheets, suggested exercises and helpful references, this book fully supports future teachers in understanding how they might implement these strategies in practice. *Methods for Teaching in Early Education* will prove indispensable for students of teaching methods courses in both general and special education programs providing a comprehensive introduction to early childhood teaching strategies relevant for today's inclusive classrooms. Teaching Children 3-11

Anne D Cockburn, Graham Handscomb, 2011-11-11. Focusing on the major topics underpinning professional studies strands in primary and early years teacher education, *Teaching Children Three Eleven* provides indispensable coverage of vital practical and conceptual issues that support good teaching practice. This Third Edition of the popular textbook has been carefully revised following detailed lecturer feedback to meet the evolving needs of students training to teach across the three to eleven age range. Featuring four new chapters on curriculum development, cross-curricular teaching, diversity and inclusion, and communication in the classroom, and engaging with the growing need for Master's level study in teacher education, the new edition offers a balanced contemporary overview of modern teaching practice in an engaging and accessible manner. This is essential reading for all students on primary and early years initial teacher education courses including undergraduate BEd BA with QTS, postgraduate PGCE, SCITT and employment based routes into teaching. It will also be invaluable for those starting out on their professional careers. Anne Cockburn is Professor of Early Years Education at the University of East Anglia. Graham Handscomb is Senior Manager in Strategic Development for School Improvement and Early Years at Essex County Council. Teaching Children Physical Education George
