advance understanding of some target of interest but just what features advance understanding and what understanding amounts to in practice varies widely over time and across scientific communities This particularist approach brings new problems and questions to the fore especially concerning interdisciplinarity how if at all do explanation and understanding get beyond the boundary of a particular community The particularist account also has implications bearing on the nature of understanding the unity of science objectivity and science society relations The argument is elaborated using detailed case studies of explanatory model connection or lack thereof immunology and epidemiology models in the COVID 19 pandemic and the explanatory ambitions of systems biology using the example of stem cell development The argument concludes with an open ended list of potential future case studies
